Welcome to the BrightLink Pro 1420Wi/1430Wi User's Guide.
Projector Features

The BrightLink Pro 1420Wi/1430Wi projectors include these special features:

**Unique interactive functions**
- Annotation with or without a computer
- Annotation with two pens at the same time
- Enhanced Easy Interactive toolbar for Windows and Mac
- Touch-based interactivity for as many as six users (BrightLink Pro 1430Wi)
- Share your whiteboard with up to 15 other devices, including tablets, smartphones, and other projectors with whiteboard sharing capabilities
- Annotate projected content from your device
- Scan and display content from a connected scanner
- Email, save, or print your content without a computer
- Import content from a USB drive

**Ultra short throw projection system**
- Project an 87-inch (221-cm) image (WXGA) from just 9.1 inches (231 mm) away
- Easily mounted on a wall (with the wall mount) or table (with the optional table projection mount) for fast, low-cost installations
- Can be mounted vertically to create an interactive workspace directly on a table surface
- Reduced shadow interference and glare

**Bright, high-resolution images**
- Up to 3300 lumens of color brightness (color light output) and 3300 lumens of white brightness (white light output)
**Note:** Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

- Native resolution of 1280 × 800 pixels (WXGA)

**Flexible connectivity**
- HDMI 1/MHL and HDMI 2 ports for computer or video device connection
- Plug-and-play 3-in-1 USB projection, audio, and mouse control for instant setup
- Wired network support for projection
- Projector monitoring and control via remote network computer
- Optional wireless network support, including video and audio transfer
- PC Free photo slide shows via connected USB memory devices or Epson document camera
- Dual VGA ports for connections by multiple presenters
- Port for connecting an external monitor
- Projection from iOS or Android devices with the wireless LAN module and free Epson iProjection app; visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information

**Innovative display and operation features**
- Low total cost of ownership with long-life projector lamp and high-efficiency air filter
- High digital zoom ratio for larger images in shorter projection distances
- 10000:1 contrast ratio and Auto Iris control for sharp, detailed images
- Built-in closed captioning decoder
- Powerful 16 W speaker system with audio out port for connecting external speakers
- Epson's Instant Off and Direct Power On features for quick setup and shut down
- Support for Crestron RoomView network monitoring systems
- Network message broadcast system to project timely messages to all networked projectors

Product Box Contents

Save all the packaging in case you need to ship the projector. Always use the original packaging (or equivalent) when shipping.

Make sure your projector box included all of these parts:

1. Projector
2. Remote control
3. Remote control batteries (two AA alkaline)
4 Pens and batteries (one AA alkaline battery for each pen)
5 Rubber feet (BrightLink Pro 1420Wi)
6 Pen tray
7 USB cables (3)
8 Power cord
9 Touch Unit connection cable (BrightLink Pro 1430Wi)
10 Password Protected sticker
11 Projector manuals and software links CD
12 Projector software for Easy Interactive Function CD
13 Touch Unit and markers (inside the unit) (BrightLink Pro 1430Wi)
14 Labels (4) (BrightLink Pro 1430Wi)
15 Tape for securing markers (BrightLink Pro 1430Wi)
16 Infrared deflectors (8) (BrightLink Pro 1430Wi)
17 Wireless LAN unit
18 Control Pad (with batteries)

**Parent topic:** Projector Features

### Additional Components

Depending on how you plan to use the projector, you may need to obtain the following additional components:

- To receive a composite video signal, you need an RCA-style video or A/V cable. See your local computer or electronics dealer for purchase information.
- To receive a component video signal, you need a D-sub, 15-pin, component-to-VGA video cable. You can purchase one from Epson or an authorized Epson reseller.
- To receive an HDMI signal, you need a compatible HDMI cable. You can purchase one from Epson or an authorized Epson reseller.

**Note:** To connect a Mac that includes only a Mini DisplayPort, Thunderbolt port, or Mini-DVI port for video output, you need to obtain an adapter that allows you to connect to the projector's **HDMI** port.
Contact Apple for compatible adapter options. Older Mac computers (2009 and earlier) may not support audio through the HDMI port.

• To receive an HDMI signal via MHL, you need an MHL-compatible device, an MHL cable or an HDMI cable and an MHL adapter compatible with your device. Devices with an integrated MHL connector may not require a cable.
• To sync additional BrightLink Pro projectors together, you will need a stereo mini cable or the remote control cable set (ELPKC28).
• To power the Control Pad from the projector, you will need the remote control cable set (ELPKC28).
• To project with audio from certain ports, you may need a commercially available audio cable compatible with your device. See your local computer or electronics dealer for purchase information.
• If you did not purchase a mount that included a VGA cable, you may need a VGA computer cable. You can purchase one from Epson or an authorized Epson reseller.

### Warranty and Registration Information

Your projector comes with a basic warranty that lets you project with confidence. For details, see the warranty that came with your projector.

In addition, Epson offers free Extra Care Road Service. In the unlikely event of an equipment failure, you won’t have to wait for your unit to be repaired. Instead, Epson will ship you a replacement unit anywhere in the United States, Canada, or Puerto Rico. See the Extra Care Road Service brochure for details.
Register your product online using the projector CD or at this site: epson.com/webreg. Registering also lets you receive special updates on new accessories, products, and services.

Notations Used in the Documentation

Follow the guidelines in these notations as you read your documentation:

• **Warnings** must be followed carefully to avoid bodily injury.
• **Cautions** must be observed to avoid damage to your equipment.
• **Notes** contain important information about your projector.
• **Tips** contain additional projection information.

Parent topic: Introduction to Your Projector

Where to Go for Additional Information

Need quick help on using your projector? Here's where to look for help:

• **Built-in help system**
  Press the **Help** button on the remote control or projector to get quick solutions to common problems.

• **Help icon on the bottom whiteboard toolbar**
  Select the help icon to get a quick summary of the tools and features available.

• **epson.com/support** (U.S) or epson.ca/support (Canada)
  View FAQs (frequently asked questions) and e-mail your questions to Epson technical support 24 hours a day.

• For detailed instructions on using your projector in a network environment, see the *EasyMP Network Projection Operation Guide*.

• For detailed instructions on monitoring your projector in a network environment (Windows only), see the *EasyMP Monitor Operation Guide*.

• For detailed instructions on using your projector to hold interactive meetings in a network environment, see the *EasyMP Multi PC Projection Operation Guide*.

• If you still need help after checking this manual and the sources listed above, you can use the Epson PrivateLine Support service to get help fast. For details, see "Where to Get Help".

Setting Up the Projector

Follow the instructions in these sections to set up your projector for use.

- Projector Placement
- Removing and Attaching the Cable Cover
- Adjusting the Angle of the Touch Unit
- Installing the Projector Feet
- Projector Connections
- Installing Batteries in the Remote Control
- Installing Batteries in the Pens
- Installing Batteries in the Control Pad

Projector Placement

Your ultra-short throw projector is designed to be installed on a wall (with a wall mount) or vertically on a table (with a table mount) to create an interactive tabletop workspace.

Keep these considerations in mind as you select a projector location:

- Follow the instructions in the *Installation Guide* provided with your mounting hardware to install the projector using the included mounting equipment.
- Leave plenty of space around and under the projector for ventilation, and do not place it on top of or next to anything that could block the vents.
- Position the projector within reach of a grounded electrical outlet or extension cord.
- If installing vertically on a desk or table, the table projection mount (V12H516020) is required.
- If installing on a wall, the wall mount (V12H675020) is required.

Parent topic: Setting Up the Projector

Projector Setup and Installation Options

You can set up or install your projector in the following ways:
Mounted on the wall or ceiling

Mounted vertically on a table to create an interactive workspace

Wherever you set up the projector, make sure to position it squarely in front of the screen, not at an angle.

**Parent topic:** Projector Placement

**Related references**

Projector Setup Settings - Extended Menu

**Projection Distance**

The distance at which you place the projector from the screen determines the approximate size of the image. The image size increases the farther the projector is from the screen, but can vary depending on the zoom factor, aspect ratio, and other settings.

Use the tables here to determine approximately how far to place the projector from the screen based on the size of the projected image. (Conversion figures may have been rounded up or down.) For more detailed information and installation instructions, see the *Installation Guide* provided with your wall.
mount. You can also use the projector Throw Distance Calculator at epson.com/support (U.S.) or epson.ca/support (Canada).

**Note:** All minimum ceiling heights are based on an image 30 inches (76 cm) from the floor.

</table>
Removing and Attaching the Cable Cover

Before you can connect equipment to your projector, you need to remove the cable cover.
1. Remove both of the cable cover screws (screwdriver not included).
2. Slide off the cable cover.

To attach the cable cover, slide it into position and tighten the screws.

Adjusting the Angle of the Touch Unit

You can adjust the angle of the Touch Unit to detect the position of your fingers.
Note: These instructions require that the Touch Unit is mounted and connected according to the *Installation Guide* provided with your projector or projector mount.

1. Turn the projector on.
2. Loosen the screw at the bottom of the Touch Unit.

3. Remove the dial cover from the Touch Unit.
4. Remove the markers from inside the Touch Unit.

5. Press the **Menu** button on the remote control or projector control panel.

6. Select **Easy Interactive Function** from the **Extended** menu.
7. Select **Touch Unit Setup**.

8. Make sure **Power** is set to **On**.
The Touch Unit power turns on and the indicator light turns blue.

**Warning:** Do not look into the projector's projection window or the Touch Unit's laser diffusion ports (located on the back of the Touch Unit); this could cause injury to eyesight.

9. Select **Angle Adjustment**.

The Angle Adjustment screen is displayed.
10. Turn the adjustment dials on the Touch Unit counterclockwise until you hear a click. Press the button on the remote control.

**Note:** Make sure to stop turning the dials when you hear the click.

11. Attach the two markers you removed from the Touch Unit to the marker positions shown on the projected screen ( ).
12. Match the positions so that the crosses (A) overlap with the points (B) on the marker positions. Move the marker over the projected cross until the lines of the cross align with the lines on the marker.

13. When pointers with the same color (blue and green) as the marker positions are displayed on the left and right of the projection surface, attach the markers to the projection surface as follows:
- For magnetic screens: Place the bottom of the markers on the screen.
• For non-magnetic screens: Use the supplied tape to secure the markers. Attach the tape so that each end of the marker is secure on the screen.

Correct position:

Incorrect position:

**Note:** Do not place anything other than the markers near the projected image during angle adjustment. If other objects are on the projected image, angle adjustment may not be performed correctly.
14. Turn the adjustment dials on the Touch Unit to move the pointers so that they move inside of the target of the same color (blue and green) on either side. Turning an adjustment dial clockwise moves the pointer diagonally up towards the center of the projected image.
Turning an adjustment dial counterclockwise moves the pointer diagonally down away from the center of the projected image.

When the pointers are inside the target, the colors become solid (●●) (●●)

**Note:** If a dial makes a clicking sounds, the pointer will not move any further. When turning the dials, make sure the shadows from your arm or body do not cover the markers.

15. When the pointers on the left and right become solid colors, press the ↘ button on the remote control.
The next adjustment screen is displayed.
16. Place the markers at the top marker positions [1]. When angle adjustment is performed correctly, the upper pointers become solid colors. If the upper pointers do not become solid colors, start again from step 9.
17. Place the markers at the bottom marker positions [2]. When angle adjustment is performed correctly, the bottom pointers become solid colors. If the bottom pointers do not become solid colors, start again from step 9.

18. When you have finished checking the marker positions, remove the markets and press the ➩ button on the remote control.
The following confirmation screen is displayed:
19. Trace the dots with your finger as shown. When angle adjustment is performed correctly, the traced
dots disappear.

**Note:** Finger touch operations may not function correctly if you are wearing bandages, artificial nails,
nail polish, or anything else that may obstruct your fingers.

20. When all of the dots have disappeared, press the press the button on the remote control and go
to the next step.

If any dots remain (as shown below), do the following:

- Remove any obstacles from around the projected screen. When you are finished, press the up or
down arrow button on the remote control and repeat step 19.
- If the dots still remain after removing obstacles, turn the adjustment dials about a quarter turn
clockwise. Press the up or down arrow button on the remote control and repeat step 19.
• If the dots still remain or there are obstacles that cannot be removed, such as whiteboard trays or frames, go to step 21.
21. If there is an obstacle that cannot be removed such as a whiteboard tray or frame, remove the tape from the back of the supplied infrared deflectors and stick them to the screen so that the laser is not reflected by the obstacle. Make sure to stick the deflectors between the dots and the obstacle and adjust the number of deflectors according to the number of dots.

![Diagram showing infrared deflectors being applied to a screen to correct a reflection issue.]

**Note:** Do not remove an infrared deflector once it has been stuck in place. Do not stick tape or place anything on the infrared deflectors. The deflectors will not function properly if anything is placed on them.

22. After placing the infrared deflectors, press the up or down arrow button on the remote control and repeat step 19. If the dots do not disappear even after attaching the infrared deflectors, turn the adjustment dials about a quarter turn counterclockwise. Press the up or down arrow button on the remote control and repeat step 19.

**Note:** If the dots do not disappear even after performing the above procedure, contact Epson support.
23. Perform touch calibration by pressing the **Menu** button on the remote control. On the **Extended** menu, select **Easy Interactive Function**, then select **Touch Unit Setup**. Select **Touch Calibration** and follow the instructions.
24. After you have finished touch calibration, store the markers inside the Touch Unit.
25. Attach the supplied labels to the tabs on either side of the Touch Unit. Match the center of the labels with the tabs on the Touch Unit. If the Touch Unit moves out of position, use the position of the labels to determine where to reposition the Touch Unit.
26. Attach the dial cover. Make sure to tighten the screw at the bottom of the cover.

Installing the Projector Feet

To use the projector on a table or cart, you first need to install the feet (BrightLink Pro 1420Wi). You can then use the feet to adjust the image position.

1. Turn the projector upside down.
2. Insert the larger front foot into the hole at the front of the projector.

1. Front foot (larger)
2. Rear feet

3. Insert the two smaller rear feet into the holes at the back of the projector.

Parent topic: Setting Up the Projector

Projector Connections

You can connect the projector to a variety of computer, video, and audio sources to display presentations, movies, or other images, with or without sound.

- Connect any type of computer that has a USB port, standard video output (monitor) port, or HDMI port.
- For video projection, connect devices such as DVD players, gaming consoles, digital cameras, and smartphones with compatible video output ports.
- If your presentation or video includes sound, you can connect audio input cables, if necessary.
- For slide shows without a computer, you can connect USB devices (such as a flash drive or camera) or an optional Epson document camera.

Caution: If you will use the projector at altitudes above 4921 feet (1500 m), turn on High Altitude Mode to ensure the projector’s internal temperature is regulated properly.

Connecting to a Computer for HDMI Video and Audio
Connecting to a Computer for Pen Use or USB Mouse Control
Connecting to a Computer for Sound
Connecting a Computer to the Control Pad

Parent topic: Projector Connections

Connecting to a Computer for USB Video and Audio
If your computer meets the system requirements, you can send video and audio output to the projector through the computer's USB port (preferably USB 2.0). Connect the projector to your computer using a USB cable.

You can also connect your computer to the control pad.

Note: This also lets you use the interactive pens with your computer. You need to change the USB Type B setting in the projector's Extended menu before you can project through the USB port. Note that using USB Display will slow interactive pen function. For the best performance, VGA or HDMI connections are recommended.

Note: You can connect your computer's USB cable to the control pad instead of directly to the projector.
1. Turn on your computer.
2. Connect the cable to your projector’s **USB-B** port.

3. Connect the other end to any available USB port on your computer.
4. To use USB Display, do one of the following:
   - **Windows 8.x**: Click **EPSON_PJ_UD** in the upper right-corner, then select **Run EMP_UDSE.exe** in the dialog box that appears to install the Epson USB Display software.
   - **Windows 7/Windows Vista**: Select **Run EMP_UDSE.exe** in the dialog box that appears to install the Epson USB Display software.
   - **Windows XP**: Wait as messages appear on your computer screen and the projector installs the Epson USB Display software on your computer.
   - **Windows 2000**: Select **Computer**, **EPSON_PJ_UD**, and **EMP_UDSE.EXE** to install the Epson USB Display software.
   - **OS X**: The USB Display setup folder appears on your screen. Select **USB Display Installer** and follow the on-screen instructions to install the Epson USB Display software.

   Follow any on-screen instructions. You need to install this software only the first time you connect the projector to the computer.

The projector displays the image from your computer’s desktop and outputs sound, if your presentation contains audio.

**Parent topic**: Connecting to Computer Sources

**Connecting to a Computer for VGA Video**

You can connect the projector to your computer using a VGA computer cable.
**Note**: To connect a Mac that includes only a Mini DisplayPort, Thunderbolt port, or Mini-DVI port for video output, you need to obtain an adapter that allows you to connect to the projector's VGA video port. Contact Apple for compatible adapter options.

1. If necessary, disconnect your computer's monitor cable.
2. Connect the VGA computer cable to your computer's monitor port.
3. Connect the other end to a **Computer** port on the projector.
4. Tighten the screws on the VGA connector.

**Parent topic**: Connecting to Computer Sources

**Connecting to a Computer for HDMI Video and Audio**

If your computer has an HDMI port, you can connect it to the projector using an optional HDMI cable.

**Note**: To connect a Mac that includes only a Mini DisplayPort, Thunderbolt port, or Mini-DVI port for video output, you need to obtain an adapter that allows you to connect to the projector's **HDMI** port. Contact Apple for compatible adapter options. Older Mac computers (2009 and earlier) may not support audio through the **HDMI** port.

1. Connect the HDMI cable to your computer's HDMI output port.
2. Connect the other end to one of the projector’s HDMI ports.

![Diagram of HDMI connection](image)

**Note:** The projector converts the digital audio signal sent from your computer into a mono analog signal for the internal speaker or a stereo analog signal if you are connecting to external speakers.

Parent topic: Connecting to Computer Sources

Connecting to a Computer for Pen Use or USB Mouse Control

If you connected your computer to a **Computer** or **HDMI** port on the projector, you also need to connect the USB cable so you can use the pens with your computer.

**Note:** You can connect your computer’s USB cable to the control pad instead of directly to the projector.

Connecting the USB cable also lets you set up the remote control to act as a wireless mouse, but you cannot use this feature at the same time you are using the pens with your computer.

1. Connect the USB cable to your projector’s **USB-B** port.

![Diagram of USB-B connection](image)

2. Connect the other end to any available USB port on your computer.
If you want to use the remote control as a wireless mouse, you need to change the **USB Type B** setting in the projector's Extended menu. You may also need to configure your computer to work with an external USB mouse. See your computer documentation for details.

### Connecting to a Computer for Sound

If your computer presentation includes sound and you did not connect it to the projector's **USB-B** or an **HDMI** port, you can still play sound through the projector's speaker system. Just connect an optional 3.5 mm stereo mini-jack audio cable as described here.

1. Connect the audio cable to your laptop's headphone or audio-out jack, or your desktop's speaker or audio-out port.
2. Connect the other end to the **Audio** port that corresponds to the **Computer** port you are using.

**Parent topic:** Connecting to Computer Sources

### Connecting a Computer to the Control Pad

If your computer meets the system requirements, you can send video and audio output to the projector through the control pad's **USB-B** port (preferably USB 2.0). Connect the projector and your computer to the control pad using USB cables.
Caution: Make sure the control pad is positioned no more than 6.5 ft (2 m) away from the projector, and no obstacles are blocking the signal from the projector. Do not place the control pad behind the projection surface.

Note: This also lets you use the interactive pens with your computer. You need to adjust the USB Type B setting in the projector’s Extended menu before you can project through the USB port. Note that using USB Display will slow interactive pen function. For the best performance, VGA or HDMI connections are recommended, in addition to the USB connection for interactive pen usage.

1. Turn on your computer.
2. Make sure a USB cable is connected between the USB-B port on the projector and the USB-A port on the control pad.
3. Connect another USB cable to the USB port on the bottom of the control pad and any available USB port on your computer.

4. To use USB Display, do one of the following:
   - **Windows 8.x**: Click EPSON_PJ_UD in the upper right-corner, then select Run EMP_UDSe.exe in the dialog box that appears to install the Epson USB Display software.
   - **Windows 7/Windows Vista**: Select Run EMP_UDSE.exe in the dialog box that appears to install the Epson USB Display software.
   - **Windows XP**: Wait as messages appear on your computer screen and the projector installs the Epson USB Display software on your computer.
   - **Windows 2000**: Select Computer, EPSON_PJ_UD, and EMP_UDSE.EXE to install the Epson USB Display software.
• **OS X**: The USB Display setup folder appears on your screen. Select **USB Display Installer** and follow the on-screen instructions to install the Epson USB Display software.

Follow any on-screen instructions. You need to install this software only the first time you connect the projector to the computer.

The projector displays the image from your computer’s desktop and outputs sound, if your presentation contains audio.

**Parent topic:** Connecting to Computer Sources

## Connecting to Video Sources

Follow the instructions in these sections to connect video devices to the projector.

- Connecting to an HDMI Video Source
- Connecting to an MHL-Compatible Device
- Connecting to a Component-to-VGA Video Source
- Connecting to a Composite Video Source
- Connecting to a Video Source for Sound

**Parent topic:** Projector Connections

### Connecting to an HDMI Video Source

If your video source has an HDMI port, you can connect it to the projector using an optional HDMI cable. The HDMI connection provides the best image quality.

1. Connect the HDMI cable to your video source’s HDMI output port.
2. Connect the other end to one of the projector’s HDMI ports.

![Diagram](image)

**Note:** The projector converts the digital audio signal sent from your video source into a mono analog signal for the internal speaker or a stereo analog signal if you are connecting to external speakers.
Connecting to an MHL-Compatible Device

If you have an MHL-compatible smartphone or tablet, you can connect it to the projector using either an MHL cable or an HDMI cable with a device-compatible MHL adapter. If you have a device with a built-in MHL connector, plug it directly into the HDMI 1/MHL port.

Note: Some connected devices may not charge when using an MHL adapter.

1. Connect the MHL cable or adapter to your device’s Micro-USB port.
2. If you are using an MHL adapter, connect it to an MHL-compatible HDMI cable.
3. Connect the other end of the cable to the projector’s HDMI 1/MHL port.

Note: The projector converts the digital audio signal sent from your video source into a mono analog signal for the internal speaker or a stereo analog signal if you are connecting to external speakers.

Connecting to a Component-to-VGA Video Source

If your video source has component video ports, you can connect it to the projector using an optional component-to-VGA video cable. Depending on your component ports, you may need to use an adapter cable along with a component video cable.

1. Connect the component connectors to your video source’s color-coded component video output ports, usually labeled Y, Pb, Pr or Y, Cb, Cr. If you are using an adapter, connect these connectors to your component video cable.
2. Connect the VGA connector to a Computer port on the projector.

3. Tighten the screws on the VGA connector.

   If your image colors appear incorrect, you may need to change the Input Signal setting in the projector’s Signal menu.

Parent topic: Connecting to Video Sources

Connecting to a Composite Video Source

   If your video source has a composite video port, you can connect it to the projector using an optional RCA-style video or A/V cable.

   1. Connect the cable with the yellow connector to your video source’s yellow video output port.
   2. Connect the other end to the projector’s Video port.

Parent topic: Connecting to Video Sources
Connecting to a Video Source for Sound

You can play sound through the projector's speaker system if your video source has audio output ports. Connect the projector to the video source using a stereo mini-jack adapter cable (with one 3.5 mm mini-plug and two RCA plugs).

**Note:** If you connected your video source to the projector using an HDMI or MHL cable, the audio signal is transferred with the video signal; you do not need an additional cable for sound.

1. Connect the audio cable to your video source's audio-out ports.
2. Connect the other end of the cable to the projector's **Audio** port or ports.

**Note:** To add additional sound, connect your video source and speakers to an audio video receiver, then connect the receiver to the projector using one of the receiver's compatible video outputs (an HDMI connection provides the best image quality, if available). You can also connect speakers to any video source that has its own speaker connections. External powered speakers or headphones can also be connected to the **Audio Out** port using a 3.5 mm stereo mini jack cable.

Parent topic: Connecting to Video Sources

Connecting to an External Computer Monitor

If you connected the projector to a computer using a **Computer** port, you can also connect an external monitor to the projector. This lets you see your presentation on the external monitor even when the projected image is not visible.

If you want to output images to an external monitor when the projector is turned off, you need to select **Communication On** as the **Standby Mode** setting and **Always On** as the **A/V Output** setting in the projector's menu system.
**Note:** Monitors that use a refresh rate less than 60 Hz may not be able to display images correctly.

1. Make sure your computer is connected to the projector's **Computer** port.
2. Connect the external monitor's cable to your projector's **Monitor Out** port.

**Note:** Only analog RGB signals from the Computer port can be output to an external monitor.

**Note:** Content you draw using the interactive features is not displayed on an external monitor unless you draw it using Easy Interactive Tools.

**Parent topic:** [Projector Connections](#)

### Connecting to External Speakers

To enhance the sound from your presentation, you can connect the projector to external self-powered speakers. You can control the volume using the projector's remote control.

**Note:** You can also connect the projector to an amplifier with speakers.

If you want to output audio from the external speakers when the projector is turned off, you need to select **Communication On** for the **Standby Mode** setting and **Always On** for the **A/V Output** setting in the projector’s menu system. You cannot play audio from the **USB-B** and **LAN** ports while the projector is turned off.

**Note:** The projector’s built-in speaker system is disabled when you connect external speakers.

1. Make sure your computer or video source is connected to the projector with both audio and video cables as necessary.
2. Locate the appropriate cable to connect your external speakers, such as a stereo mini-jack-to-pin-jack cable, or another type of cable or adapter.
3. Connect one end of the cable to your external speakers as necessary.
4. Connect the stereo mini-jack end of the cable to your projector’s Audio Out port.

Parent topic: Projector Connections

Connecting to External USB Devices

Follow the instructions in these sections to connect external USB devices to the projector.

USB Device Projection
Connecting a USB Device or Camera to the Projector
Connecting a USB Device to the Control Pad or Projector
Selecting the Connected USB Source
Disconnecting a USB Device From the Control Pad or Projector

Parent topic: Projector Connections

USB Device Projection

You can project images and other content without using a computer or video device by connecting any of these devices to your projector:

- USB flash drive
- Digital camera or smartphone
- USB hard drive
- Multimedia storage viewer
- USB memory card reader
**Note:** Digital cameras or smartphones must be USB-mounted devices, not TWAIN-compliant devices, and must be USB Mass Storage Class-compliant.

**Note:** USB hard drives must meet these requirements:
- USB Mass Storage Class-compliant (not all USB Mass Storage Class devices are supported)
- Formatted in FAT or FAT32
- Self-powered by their own AC power supplies (bus-powered hard drives are not recommended)
- Avoid using hard drives with multiple partitions

You can project slide shows from image files on a connected USB device or memory card reader.

**Parent topic:** Connecting to External USB Devices

### Connecting a USB Device or Camera to the Projector

You can connect your USB device or camera to the projector's **USB-A** port and use it to project images and other content.

1. If your USB device came with a power adapter, plug the device into an electrical outlet.
2. Connect the USB cable (or USB flash drive or USB memory card reader) to the projector’s **USB-A** port shown here.

   ![USB Connection Diagram](image)

   **Note:** Do not connect a USB hub or a USB cable longer than 10 feet (3 m), or the device may not operate correctly.

3. Connect the other end of the cable (if applicable) to your device.

**Parent topic:** Connecting to External USB Devices
Connecting a USB Device to the Control Pad or Projector

You can connect your USB device to the USB-A port on the control pad or projector and use it to project images and other content.

1. If your USB device came with a power adapter, plug the device into an electrical outlet.
2. Make sure a USB cable is connected between the USB-A port on the projector and the USB-B port on the control pad.
3. Connect the USB cable for the device (or USB flash drive or USB memory card reader) into the USB-A port on the bottom of the control pad.

4. Connect the other end of the cable (if applicable) to your device.

Note: You can also connect a USB device directly to the projector's USB-A port.

Parent topic: Connecting to External USB Devices

Selecting the Connected USB Source

You can switch the projector's display to the source you connected to the USB-A port on the control pad or the projector.

1. Make sure the connected USB source is turned on, if necessary.
2. Press the Source Search button on the remote control or control pad, then select USB1.

Parent topic: Connecting to External USB Devices

Disconnecting a USB Device From the Control Pad or Projector

When you finish presenting with a connected USB device, you must prepare to disconnect the device from the control pad or projector.
1. If the device has a power button, turn off and unplug the device.
2. Disconnect the USB device (or cable) from the control pad or projector.

**Parent topic:** Connecting to External USB Devices

### Connecting a Printer to the Control Pad

You can connect an Epson printer or all-in-one device to the **Printer** port on the control pad and use it to print your projected and annotated content from the whiteboard.

**Note:** Make sure the printer meets the control command requirements.

1. Make sure a USB cable is connected between the **USB-A** port on the projector and the **USB-B** port on the control pad.
2. Connect another USB cable to the **Printer** port on the control pad. Make sure the cable is no longer than 16.4 ft (5 m).
3. Connect the other end of the cable to the USB type B port on the printer.

**Note:** You can connect a wireless PCL6-compatible or Epson printer through the Whiteboard Settings menu.

**Supported Printer Types**

**Parent topic:** Projector Connections

**Related tasks**

**Connecting to a Document Camera**

You can connect a document camera to your projector to project images viewed by the camera.

Depending on your Epson document camera model, do one of the following to connect the document camera to your projector:

- For the Epson DC-06 document camera, locate the USB cable that came with the camera and connect it to the projector's **USB-A** port and to the document camera's USB Type B port.
- For the Epson DC-11 document camera, connect it to the projector’s **Computer** or **Video** port and to the corresponding port on the document camera. See the document camera manual for details.
• For the Epson DC-12 document camera, connect it to the projector’s HDMI, Computer, or Video port and to the corresponding port on the document camera. See the document camera manual for details.
• For the Epson DC-20 document camera, connect it to the projector’s HDMI, Computer, or Video port and to the corresponding port on the document camera. See the document camera manual for details.

Note: For additional features supported by software, connect your document camera to your computer instead of the projector. See the document camera manual for details.

Parent topic: Projector Connections

Connecting Multiple Projectors of the Same Model

If you use the interactive features of multiple projectors of the same model in the same room, you need to synchronize the projectors. To do this, connect the optional remote control cable set (V12H005C28) to the SYNC port on each projector.

1. Connect one end of the remote control cable to the SYNC In port on one projector, and connect the other end to the SYNC Out port on the other projector.
Note: If you are connecting three or more projectors, connect the projectors in a chain as shown.

2. In the Extended menu, set the Sync of Projectors setting to Wired.

   Note: If you are using the projector in the same room as another projector that does not support cable connection, set the Wired Sync Mode setting to Mode 2 in the projector’s Extended menu. If you do not have the optional remote control cable, set the Distance of Projectors setting in the projector’s Extended menu to Mode 2.

Parent topic: Projector Connections

Installing Batteries in the Remote Control

The remote control uses the two AA batteries that came with the projector.

Caution: Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Open the battery cover.
2. Insert the batteries with the + and – ends facing as shown.

![Battery insertion diagram]

3. Close the battery cover and press it down until it clicks into place.

![Battery cover closure diagram]

**Warning:** Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

**Parent topic:** Setting Up the Projector

**Installing Batteries in the Pens**

Each pen uses one AA battery.
1. Open the battery cover as shown.

![Battery cover open]

2. Insert the battery with the + and – ends facing as shown.

![Battery being inserted]

3. Replace the battery cover and press it down until it clicks into place.

![Battery cover closed]

**Parent topic:** Setting Up the Projector

**Installing Batteries in the Control Pad**

The control pad uses two AA batteries.
Note: If you have the optional remote control cable set (ELPKC28), you can use it instead of batteries to power the control pad.

1. Remove the top cover of the control pad by prying it off as shown.

2. Insert the batteries with the + and – ends facing as shown.
3. Replace the cover and press it down until it clicks into place.

Wired Network Projection

You can send images to your projector through a wired network. To do this, you connect the projector to your network, and then set up your projector and computer for network projection.

After connecting and setting up the projector as described here, install the network software from the Epson Projector Software CD or download the software as necessary. Use the following software and documentation to set up, control, and monitor network projection:

• EasyMP Network Projection software sets up your computer for network projection. See the EasyMP Network Projection Operation Guide for instructions.

• EasyMP Monitor software (Windows only) lets you monitor and control your projector through the network. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.

• Connect to a Network Projector (Windows 7 and Windows Vista only)
• EasyMP Multi PC Projection software allows you to hold interactive meetings by projecting the computer screens of users over a network. See the EasyMP Multi PC Projection Operation Guide for instructions.

• EasyMP Network Updater software (Windows only) allows you to update firmware for a projector over a wired LAN. See the EasyMP Network Updater Operation Guide for instructions. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.
Note: If your projector is connected via a LAN cable to a network that includes a wireless access point, you can connect to the projector wirelessly through the access point using the EasyMP Network Projection software.

Connecting to a Wired Network
Selecting Wired Network Settings
Parent topic: Using the Projector on a Network

Connecting to a Wired Network

To connect the projector to a wired local area network (LAN), use a 100Base-TX or 10Base-T network cable. To ensure proper data transmission, use a Category 5 shielded cable or better.

1. Connect one end of the network cable to your network hub, switch, or router.
2. Connect the other end of the cable to the projector’s LAN port.

Parent topic: Wired Network Projection

Selecting Wired Network Settings

Before you can project from computers on your network, you must select the network settings for the projector using its menu system.

Note: Make sure you already connected the projector to your wired network using the LAN port.

1. Turn on the projector.
2. Press the Menu button.
3. Select the **Network** menu and press **Enter**.

4. Select **Network Configuration** and press **Enter**.

5. Select the **Basic** menu and press **Enter**.
6. Select the following basic options as necessary:
   • **Projector Name** lets you enter a name up to 16 alphanumeric characters long to identify the projector over the network.
   • **PJLink Password** lets you enter a password up to 32 alphanumeric characters long for using the PJLink protocol for projector control.
   • **Web Control Password** or **Web Remote Password** lets you enter a password up to 8 alphanumeric characters long for accessing the projector over the web. (Default user name is **EPSONWEB**; default password is **admin**.)
   • **Projector Keyword** lets you turn on a security password to prevent access to the projector by anyone not in the room with it. You must enter a displayed, randomized keyword from a computer using the EasyMP Network Projection software to access the projector.

   **Note**: Use the displayed keyboard to enter the name, passwords and keyword. Press the arrow buttons on the remote control to highlight characters and press **Enter** to select them.

7. Select the **Wired LAN** menu and press **Enter**.

8. If necessary, select **IP Settings** and press **Enter**.

9. Select your IP Settings as necessary:
   • If your network assigns addresses automatically, turn on the **DHCP** setting.
• If you must set addresses manually, turn off DHCP and enter the projector’s IP Address, Subnet Mask, DNS server, WINS server, and Gateway Address as needed. When manually entering IP Settings, you cannot use restricted IP addresses.

**Note:** To highlight the numbers you want from the displayed keyboard, press the arrow buttons on the remote control. To select a highlighted number, press Enter. Or, press and hold the Num button on the remote control while entering the desired numbers.

10. To prevent display of the IP address on the standby screen, turn off IP Address Display.
11. When you finish selecting settings, select Complete or Setup Complete and follow the on-screen instructions to save your settings and exit the menus.

### Wireless Network Projection

You can send images to your projector through a wireless network. To do this, you must install the Epson 802.11b/g/n wireless LAN module, and then set up your projector and computer for wireless projection.

**Note:** If your projector is connected via a LAN cable to a network that includes a wireless access point, you can connect to the projector wirelessly using the EasyMP Network Projection software or other supported Epson network software.

There are two ways to connect the projector to your wireless network:

- Using the optional Quick Wireless Connection USB Key (Windows only)
- Configuring the connection manually using the projector’s Network menus

After installing the module and setting up the projector, install the network software from the Epson Projector Software CD or download the software, as necessary. Use the following software and documentation to set up, control, and monitor wireless projection:

- EasyMP Monitor software (Windows only) lets you monitor and control your projector through the network. You can download the latest software and documentation from the Epson web site. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.
- EasyMP Multi PC Projection software allows you to hold interactive meetings by projecting the computer screens of users over a network. See the EasyMP Multi PC Projection Operation Guide for instructions.
- Projection from iOS or Android devices with the wireless LAN module and free Epson iProjection app; visit epson.com/projectorapp (U.S.) or epson.ca/projectorapp (Canada) for more information.

**Installing the Wireless LAN Module**
Installing the Wireless LAN Module

To use the projector over a wireless network, install the Epson 802.11b/g/n wireless module in the projector. Do not install any other type of wireless module.

**Caution:** Never remove the module while its indicator light is green or flashing, or while you are projecting wirelessly. You may damage the module or lose data.

1. Turn off the projector and unplug the power cord.
2. Unscrew and remove the cable cover if it is attached (screwdriver not included).

3. Insert the wireless LAN module into the port shown here.
4. Replace the cable cover and tighten the screws.
5. Plug in and turn on the projector.

**Parent topic:** Wireless Network Projection

**Using Quick Wireless Connection (Windows Only)**

You can use the Quick Wireless Connection USB Key to quickly connect the projector to a Windows computer wirelessly. Then you can project your presentation and remove the key when you are done.

**Note:** The Quick Wireless Connection USB Key is not included with your projector.

1. Turn on the projector.
2. Connect the USB key to the projector's **USB-A** port.

   **Note:** If the control pad is connected to the projector, you can also connect the USB key to the **USB-A** port on the control pad, as shown:

   ![Diagram of USB connection](image)

   You see a projected message that the network information update is complete.

3. Remove the USB key.
4. Connect the USB key to a USB port on your computer or laptop.

   **Note:** In Windows Vista, if you see the AutoPlay window, select **Run LaunchU3.exe**, then select **Allow** on the next screen.
5. Follow the on-screen instructions to install the Quick Wireless Connection driver.

   **Note:** If you see a Windows Firewall message, click **Yes** to disable the firewall.

   After a few minutes, your computer image is displayed by the projector. If it does not appear, press the **Source Search** button on your remote control and select the **LAN** source, or restart your computer.

6. Run your presentation as necessary.

7. When you finish projecting wirelessly, select the **Safely Remove Hardware** option in the Windows taskbar, then remove the USB key from your computer.

   **Note:** You may need to restart your computer to reactivate your wireless LAN connection.

**Parent topic:** Wireless Network Projection

**Selecting Wireless Network Settings Manually**

Before you can project from your wireless network, you must select the network settings for the projector using its menu system.

1. Turn on the projector.
2. Press the **Menu** button.
3. Select the **Network** menu and press **Enter**.
4. Select **Network Configuration** and press **Enter**.

5. Select the **Basic** menu and press **Enter**.

![Network settings menu]

6. Select the following basic options as necessary:
   - **Projector Name** lets you enter a name up to 16 alphanumeric characters long to identify the projector over the network.
   - **Web Remote Password** lets you enter a password up to 8 alphanumeric characters long for accessing the projector over the web.
   - **Projector Keyword** lets you turn on a security password to prevent access to the projector by anyone not in the room with it. You must enter a displayed, randomized keyword from a computer using the EasyMP Network Projection software to access the projector.

**Note:** Use the displayed keyboard to enter the name, passwords and keyword. Press the arrow buttons on the remote control to highlight characters and press **Enter** to select them.
7. Select the **Wireless LAN** menu and press **Enter**.

8. Select the settings on the **Wireless LAN** menu as necessary for your network.

9. When you finish selecting settings, select **Setup complete** and follow the on-screen instructions to save your settings and exit the menus.

After you complete the wireless settings for your projector, you need to select the wireless network on your computer.

### Selecting Wireless Network Settings in Windows

Before connecting to the projector, select the correct wireless network on your computer.

1. To access your wireless utility software, double-click the network icon on the Windows taskbar.
2. Do one of the following:
   - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
   - If your projector is configured for Quick mode, select the projector's SSID.
3. Click **Connect**.
Selecting Wireless Network Settings in OS X

Before connecting to the projector, select the correct wireless network in OS X.

1. Click the AirPort icon on the menu bar at the top of the screen.
2. Make sure AirPort is turned on, then do one of the following:
   - If your projector is set up on an existing network (Advanced mode), select the network name (SSID).
   - If your projector is configured for Quick mode, select the projector's SSID.

Enabling WPA or EAP Security

Set up the WPA or EAP security settings to match your network’s settings. Check with your network administrator for guidance on entering the correct information.

1. Select a WPA or EAP setting from the drop-down menu.
2. Select the settings on the security menu as necessary for your network.
3. When you finish selecting settings, select **Setup complete** and follow the on-screen instructions to save your settings and exit the menus.

**Setting Up Projector Network E-Mail Alerts**

You can set up the projector to send you an e-mail alert over the network if there is a problem with the projector.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter**.
3. Select **Network Configuration** and press **Enter**.
4. Select the **Administrator Settings** menu and press **Enter**, then select **Mail Notification** and press **Enter**.

5. Enter the IP address for the **SMTP Server** option.

   **Note:** Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255).

6. Select a number for the SMTP server **Port Number**, from 1 to 65535 (default is 25).

7. Choose an **Email Address** field, enter the e-mail address, and select the alerts you want to receive there. Repeat for up to three addresses.

   **Note:** Your e-mail address can be up to 32 alphanumeric characters long.

8. When you finish selecting settings, select **Setup Complete** and follow the on-screen instructions to save your settings and exit the menus.

   **Note:** If a critical problem causes the projector to shut down, you may not receive an e-mail alert.

Network Projector E-mail Alert Messages
Network Projector E-mail Alert Messages

When a problem occurs with a networked projector, and you selected to receive e-mail alerts, you receive an e-mail containing the following information:

- **Epson Projector** on the subject line
- The name of the projector experiencing a problem
- The IP address of the affected projector
- Detailed information about the problem

**Note:** If a critical problem causes a projector to shut down, you may not receive an e-mail alert.

Setting Up Monitoring Using SNMP

Network administrators can install SNMP (Simple Network Management Protocol) software on network computers so they can monitor projectors. If your network uses this software, you can set up the projector for SNMP monitoring.

1. Press the **Menu** button.
2. Select the **Network** menu and press **Enter**.
3. Select **Network Configuration** and press **Enter**.
4. Select the **Administrator Setting** menu and press **Enter**, then select the **SNMP** menu and press **Enter**.

![Image of SNMP settings menu]

5. Enter up to two IP addresses to receive SNMP notifications, using 0 to 255 for each address field.

   **Note:** Do not use these addresses: 127.x.x.x or 224.0.0.0 through 255.255.255.255 (where x is a number from 0 to 255).

6. Enter the community name of SNMP (up to 32 single-byte alphanumeric characters).

7. When you finish selecting settings, select **Setup Complete** and follow the on-screen instructions to save your settings and exit the menus.

**Parent topic:** [Using the Projector on a Network](#)

### Controlling a Networked Projector Using a Web Browser

Once you have connected your projector to your network, you can select projector settings and control projection using a compatible web browser. This lets you access the projector remotely.

**Note:** The web setup and control features support Microsoft Internet Explorer 8.0 or later, and Safari on networks that do not use a proxy server for connection. You cannot select all of the projector menu settings or control all projector functions using a web browser.
**Note:** If you want to use a web browser to select settings when the projector is turned off, you need to adjust the **Standby Mode** settings in the ECO menu.

1. Make sure the projector is turned on.
2. Start your web browser on a computer connected to the network.
3. Type the projector’s IP address into the browser’s address box and press the computer’s **Enter** key. You see the Web Control screen and a prompt to enter a user ID and password.
4. Enter the following information in uppercase or lowercase letters, exactly as shown:
   - For the user ID, enter **EPSONWEB**. (You cannot change the user ID.)
   - For the password, enter the default password **admin**. (You can change the Web Control password using the projector’s Network menu.)
5. To select projector menu settings, select the name of the menu and follow the on-screen instructions to select settings.
6. To control projection remotely, select the **Web Remote** option.

**Note:** If the Web Remote Password is set to **On**, the user ID for the remote is **EPSONREMOTE**.

You see this screen:

![Web Remote Screen](image-url)
2 Captures the projected image. Switch to whiteboard mode to paste the image into a new page.
3 Prints the projected image.
4 Freeze button control
5 A/V Mute button control
6 Page Up and Page Down button controls
7 Searches for sources
8 Switches to whiteboard mode.
9 Saves the projected image in .png format.
10 Volume button controls
11 Closed Caption control

7. Select the icon corresponding to the projector function you want to control.

Creating an Address Book

When sending e-mails from whiteboard mode, you can choose e-mail addresses from an address book. You can create the address book by loading a text file of up to 999 addresses through the web control page.

Note: Addresses are displayed in the order they appear in the text file.

1. Create the text file containing the list of addresses you want to add to the address book. The file must have the following characteristics:
   • Tab-delimited
   • Each line must contain a pair of strings separated by a tab: <name> <tab> <email_address>
   • Filename with a .txt extension
   • Character code must be Unicode
   An example of a text file:
2. Open a web browser and connect to the projector by entering the IP address of the projector.

   **Note:** You can find the projector's IP address in the projector's Network menu.

3. Enter the user name and password at the prompts.
4. Select the **config** icon.

   **Note:** This icon does not appear when you connect from a computer.

   The Web Control page is displayed.

5. Select **Whiteboard Settings > Administrator Settings > Address Book Settings > Address Book File** and select the **Choose File** button.

6. Select the address book file and select **Set**.

   The address book file is uploaded to the projector.

7. To delete the address book, select **Whiteboard Settings > Administrator Settings > Address Book Settings > Delete Address Book** and select **Set**.

### Adding Templates from a Web Browser

You can use a web browser to add templates for use in Whiteboard mode. You can add up to 5 images, which must be in .png format to be used as templates.

1. Make sure the projector is turned on.
2. Start your web browser on a computer connected to the network.
3. Type the projector’s IP address into the browser’s address box and press the computer’s **Enter** key.
   
   You see the Web Control screen and a prompt to enter a user ID and password.
4. Enter the following information in uppercase or lowercase letters, exactly as shown:
   
   - For the user ID, enter **EPSONWEB**. (You cannot change the user ID.)
• For the password, enter the default password admin. (You can change the Web Control password using the projector’s Network menu.)

5. Under **Whiteboard Settings**, select **Administrator Settings**.

You see a screen like this:

![Whiteboard Settings Administrator Settings screen](image)

6. Under **Template Settings**, select the number of the template you are uploading.

7. Select the **Browse** button, select the .png image on your computer, and select **Open**.

8. Select **Set** to upload the template to the projector.

**Crestron RoomView Support**

If you are using the Crestron RoomView network monitoring and control system, you can set up your projector for use on the system. Crestron RoomView lets you control and monitor your projector using a web browser.

**Note:** You cannot use the Epson Web Control feature or the Message Broadcasting plug-in for EasyMP Monitor when you use Crestron RoomView.

For additional information on Crestron RoomView, contact Crestron.
Setting Up Crestron RoomView Support
Controlling a Networked Projector Using Crestron RoomView

Parent topic: Using the Projector on a Network

Setting Up Crestron RoomView Support

To set up your projector for monitoring and control using a Crestron RoomView system, make sure your computer and projector are connected to the network.

Note: If you want to use the Crestron RoomView system when the projector is turned off, you need to adjust the Standby Mode settings in the ECO menu.

1. Press the Menu button.
2. Select the Network menu and press Enter.
4. Select the Administrator Setting menu and press Enter.

![Network settings menu]

5. Set the Crestron RoomView setting to On to allow the projector to be detected.
6. Turn off the projector, then turn it on again to enable the setting.
Controlling a Networked Projector Using Crestron RoomView

Once you have set up your projector to use Crestron RoomView, you can control and monitor projection using a compatible web browser.

1. Start your web browser on a computer connected to the network.
2. Type the projector’s IP address into the browser’s address box and press the computer’s Enter key. You see this screen:

3. Select the input source that you want to control in the Sources List box. You can scroll through available sources using the up and down arrows in the box.

4. To control projection remotely, click the on-screen buttons that correspond to the projector’s remote control buttons. You can scroll through button options at the bottom of the screen.

   **Note:** These on-screen buttons do not directly correspond to the projector’s remote control buttons:
   - **OK** acts as the Enter button
   - **Menu** displays the projector’s menu

5. To view information about the projector, click the Info tab.
6. To change projector, Crestron, and password settings, click the Tools tab, select settings on the displayed screen, and click Send.
7. When you finish selecting settings, click **Exit** to exit the program.

**Parent topic:** Crestron RoomView Support
Using Basic Projector Features

Follow the instructions in these sections to use your projector's basic features.

- Turning On the Projector
- Turning Off the Projector
- Selecting the Language for the Projector Menus
- Setting the Date and Time
- Image Shape
- Resizing the Image with the Wide and Tele Buttons
- Adjusting the Image Position
- Focusing the Image
- Remote Control Operation
- Selecting an Image Source
- Projection Modes
- Image Aspect Ratio
- Color Mode
- Controlling the Volume with the Volume Buttons
- Projecting a PC Free Presentation

**Turning On the Projector**

Turn on the computer or video equipment you want to use before you turn on the projector so it can display the image source.
1. Connect the power cord to the projector's power inlet.

2. Plug the power cord into an electrical outlet.

   **Note:** With **Direct Power On** turned on, the projector turns on as soon as you plug it in.

   The projector's power light turns blue. This indicates that the projector is receiving power.

3. Press the power button on the projector or the remote control to turn on the projector.

   The projector beeps and the Status light flashes blue as the projector warms up. Once the projector is warmed up, the Status light stops flashing and turns blue.

   **Warning:** Never look into the projector lens when the lamp is on. This can damage your eyes and is especially dangerous for children.
If you do not see a projected image right away, try the following:
• Turn on the connected computer or video device.
• Press the **Source Search** button on the projector or remote control to detect the video source.

**Parent topic:** Using Basic Projector Features

## Turning Off the Projector

Before turning off the projector, shut down any computer connected to it so you can see the computer display during shutdown.

**Note:** Turn off this product when not in use to prolong the life of the projector. Lamp life will vary depending upon mode selected, environmental conditions, and usage. Brightness decreases over time.

**Note:** When using the A/V Mute feature, the projector lamp is still on. To turn off the lamp, turn off the projector.

1. Press the power button on the projector or the remote control.
   The projector displays a shutdown confirmation screen.

   ![Power Off?](image)

   **Yes:** Press button
   **No:** Press any other button

2. Press the power button again. (To leave it on, press any other button.)
   The projector beeps twice, the lamp turns off, and the Status light turns off.

   **Note:** With Epson’s Instant Off technology, there is no cool-down period so you can pack up the projector for transport right away (if necessary).
Caution: Do not turn the projector on immediately after turning it off. Turning the projector on and off frequently may shorten the life of the lamp.

3. To transport or store the projector, make sure the Status light is off, then unplug the power cord.

Caution: To avoid damaging the projector or lamp, never unplug the power cord when the Status light is on or flashing.

Selecting the Language for the Projector Menus

If you want to view the projector's menus and messages in another language, you can change the Language setting.

1. Turn on the projector.
2. Press the Menu button.
3. Select the **Extended** menu and press **Enter**.

![Extended menu screenshot](image)

4. Select the **Language** setting and press **Enter**.

5. Select the language you want to use and press **Enter**.

6. Press **Menu** or **Esc** to exit the menus.

**Parent topic:** Using Basic Projector Features

---

### Setting the Date and Time

You must set the projector’s date and time to schedule projector events and use wireless LAN authentication.

1. Press the **Menu** button.

2. Select the **Extended** menu and press **Enter**.

3. Select the **Time/Schedule Settings** setting and press **Enter**.
The Schedule Settings screen appears.

4. Select the **Date & Time** setting and press **Enter**.
5. Do one of the following:
   - Enter the date and time settings using the on-screen keyboard.
   - Select **On** as the **Use Internet Time** setting and enter the IP address for the time server in the **Internet Time Server** field.
6. Select **Change DST Settings** and select the Daylight Savings Time setting for your location.
7. When you are finished, press the **Esc** button.
8. Select **Setup complete** and select **Yes** to save your changes.
Image Shape

You can project an evenly rectangular image by placing the projector directly in front of the center of the screen and keeping it level. If you place the projector at an angle to the screen, or tilted up or down, or off to the side, you may need to correct the image shape for the best display quality.

Note: For interactive use, the image must be evenly rectangular, without distortion.

Correcting Image Shape with the Keystone Buttons

Correcting Image Shape with Quick Corner

Correcting Image Shape with the Keystone Buttons

You can use the projector's keystone correction buttons to correct the shape of an image that is unevenly rectangular on the sides.

Note: For interactive use, make sure the degree of horizontal and vertical keystone correction is no more than ±3°.

1. Turn on the projector and display an image.

   Note: You can display a pattern to aid in adjusting the projected image using the Settings menu.

   Note: You can also display the pattern by pressing the User button on the remote control (if the test pattern is assigned to this button).
2. Press one of these keystone buttons on the control panel to display the Keystone adjustment screen.
3. Press a keystone button on the projector's control panel to adjust the image shape.

**Note:** The horizontal keystone adjustment buttons are labeled **Wide** and **Tele**.

After correction, your image is slightly smaller.

**Note:** If the projector is installed out of reach, you can also correct the image shape with the remote control using the **Keystone** settings in the projector menus.

**Parent topic:** Image Shape
Correcting Image Shape with Quick Corner

You can use the projector's Quick Corner setting to correct the shape and size of an image that is unevenly rectangular on all sides.

1. Turn on the projector and display an image.

   **Note:** You can display a pattern to aid in adjusting the projected image using the Settings menu.

   **Note:** You can also display the pattern by pressing the **User** button on the remote control (if the test pattern is assigned to this button).

2. Press the **Menu** button.
3. Select the **Settings** menu and press **Enter**.
4. Select the **Keystone** setting and press **Enter**.
5. Select the **Quick Corner** setting and press **Enter**. Then press **Enter** again.
You see the Quick Corner adjustment screen:

![Quick Corner]

Select the area.

6. Use the arrow buttons on the projector or the remote control to select the corner of the image you want to adjust. Then press **Enter**.
7. Press the arrow buttons to adjust the image shape as necessary.
8. When you are finished, press **Esc**.

**Note:** Using Quick Corner can affect the accuracy of the interactive pens.

**Parent topic:** Image Shape

**Resizing the Image with the Wide and Tele Buttons**

1. Turn on the projector and display an image.
2. To enlarge the image size, press the **Wide** button on the projector’s control panel.
3. To reduce the image size, press the Tele button.

After you adjust the image size, the Image Shift screen is displayed automatically for adjusting the image position.

**Note:** If the projector is installed out of reach, you can also adjust the image size with the remote control using the Zoom setting in the projector menus.

**Parent topic:** Using Basic Projector Features

**Focusing the Image**

1. Turn on the projector and display an image.
   
   **Note:** You can display a pattern to aid in adjusting the projected image using the Settings menu.

2. Slide the switch to open the air filter cover on the side of the projector.
3. Raise or lower the focus lever to sharpen the image.

Remote Control Operation

The remote control lets you control the projector from almost anywhere in the room, up to 19.7 feet (6 m) away. You can point it at the screen or board, or the front or back of the projector.
Make sure that you aim the remote control at the projector’s receivers within the angles listed here.

1 19.7 feet (6 m)
2 ± 30°
3 ± 55°
4 60°
5 75°
6 15°

Note: Avoid using the remote control in conditions with bright fluorescent lights or in direct sunlight, or the projector may not respond to commands. If you will not use the remote control for a long time, remove the batteries.

Using the Remote Control as a Wireless Mouse
Using the Remote Control as a Pointer

Parent topic: Using Basic Projector Features
Using the Remote Control as a Wireless Mouse

You can use the projector’s remote control as a wireless mouse so you can control projection at a distance from the computer.

**Note:** This feature cannot be used at the same time as the interactive pens. If you want to use the remote control as a wireless mouse, you need to change the USB Type B setting in the projector’s Extended menu.

1. Connect the projector to a computer using the projector’s USB-B, Computer, or HDMI port to display video.

   **Note:** You cannot use the wireless mouse feature with an MHL connection.

2. If you connected your computer to the Computer or HDMI port, also connect a USB cable to the projector’s USB-B port and to a USB port on your computer (for wireless mouse support).
3. Start your presentation.
4. Use the following buttons on the remote control to control your presentation:
   - To move through slides or pages, press the up or down Page buttons.
   - To move the cursor on the screen, use the arrow buttons.
   - To left-click, press the button once (press it twice to double-click).
   - To right-click, press the Esc button.
   - To drag-and-drop, hold the button as you move the cursor with the arrow buttons, then release at the destination.
Using the Remote Control as a Pointer

You can use the projector's remote control as a pointer to help you call out important information on the screen. The default pointer shape is an arrow, but you can select an alternative shape using the Settings menu.

1. Press the **Pointer** button on the remote control.

2. Use the arrow buttons on the remote control to move the pointer on the screen.

3. Press **Esc** to clear the pointer from the screen.

Selecting an Image Source

If you connected multiple image sources to the projector, such as a computer and DVD player, you may want to switch from one image source to the other.

1. Make sure the connected image source you want to use is turned on.
2. For video image sources, insert a DVD or other video media and press its play button, if necessary.
3. Press the **Source Search** button on the projector, remote control, or control pad, then select the source you want.

**Parent topic:** Using Basic Projector Features

**Related tasks**

- Selecting a Networked Device Source

### Projection Modes

Depending on how you positioned the projector, you may need to change the projection mode so your images project correctly.

- **Front** lets you project from a table in front of the screen.
- **Front/Upside Down** (default setting) flips the image over top-to-bottom to project upside-down from a wall or ceiling mount. This mode should also be used when you mount the projector vertically on a table to create an interactive work surface.
- **Rear** flips the image horizontally to project from behind a translucent screen.
- **Rear/Upside Down** flips the image over top-to-bottom and horizontally to project from the wall or ceiling and behind a translucent screen.

**Note:** The two Rear modes cannot be used with the interactive pens.

You can change the projection mode using the remote control or by changing the **Projection** setting in the **Extended** menu.

**Changing the Projection Mode Using the Remote Control**

1. Turn on the projector and display an image.
2. Hold down the **A/V Mute** button on the remote control for five seconds. The image disappears briefly and reappears flipped top-to-bottom.
3. To change projection back to the original mode, hold down the **A/V Mute** button for five seconds again.

Image Aspect Ratio

The projector can display images in different width-to-height ratios called aspect ratios. Normally the input signal from your video source determines the image’s aspect ratio. However, for certain images you can change the aspect ratio to fit your screen by pressing a button on the remote control.
If you always want to use a particular aspect ratio for a certain video input source, you can select it using the projector’s menus.

Changing the Image Aspect Ratio
Available Image Aspect Ratios

**Parent topic:** Using Basic Projector Features

## Changing the Image Aspect Ratio

You can change the aspect ratio of the displayed image to resize it.

1. Turn on the projector and switch to the image source you want to use.
2. Press the **Aspect** button on the remote control.

   ![Remote Control Buttons](image)

   The shape and size of the displayed image changes, and the name of the aspect ratio appears briefly on the screen.

3. To cycle through the available aspect ratios for your input signal, press the **Aspect** button repeatedly.

   **Parent topic:** Image Aspect Ratio

## Available Image Aspect Ratios

You can select the following image aspect ratios, depending on the input signal from your image source.

**Note:** Black bands and cropped images may project in certain aspect ratios, depending on the aspect ratio and resolution of your input signal.
<table>
<thead>
<tr>
<th>Aspect ratio setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Automatically sets the aspect ratio according to the input signal and the Resolution setting.</td>
</tr>
<tr>
<td>Normal</td>
<td>Displays images using the full projection area and maintains the aspect ratio of the image.</td>
</tr>
<tr>
<td>16:9</td>
<td>Converts the aspect ratio of the image to 16:9.</td>
</tr>
<tr>
<td>Full</td>
<td>Displays images using the full width of the projection area, but does not maintain the aspect ratio.</td>
</tr>
<tr>
<td>Zoom</td>
<td>Displays images using the full width of the projection area and maintains the aspect ratio of the image.</td>
</tr>
<tr>
<td>Native</td>
<td>Displays images as is (aspect ratio and resolution are maintained).</td>
</tr>
</tbody>
</table>

**Note:** The **Auto** aspect ratio setting is available only for HDMI image sources.

**Parent topic:** Image Aspect Ratio

## Color Mode

The projector offers different Color Modes to provide optimum brightness, contrast, and color for a variety of viewing environments and image types. You can select a mode designed to match your image and environment, or experiment with the available modes.

If you always want to use a particular color mode for a certain video input source, you can select it using the projector menus.

- **Changing the Color Mode**

Turning On Auto Iris
In certain color modes, you can turn on the Auto Iris setting to automatically optimize the image based on the brightness of the content you project.

1. Turn on the projector and switch to the image source you want to use.
2. Press the Menu button.
4. Select the Auto Iris setting and choose one of the following:
   - High Speed to adjust brightness as soon as the scene changes.
   - Normal for standard brightness adjustment.

   Note: You can set Auto Iris for each Color Mode that supports the feature. You cannot change the Auto Iris setting when you are using a Closed Caption setting.
5. Press Menu or Esc to exit the menus.
Controlling the Volume with the Volume Buttons

You can use the Volume buttons on the remote control to adjust the volume as you project a presentation with audio. The volume buttons control the projector’s internal speaker system or any external speakers you connected to the projector.

You must adjust the volume separately for each connected input source.

1. Turn on the projector and start a presentation that includes audio.
2. To lower or raise the volume, press the Volume buttons on the remote control.

   A volume gauge appears on the screen.

3. To set the volume to a specific level for an input source, use the projector menus.

**Note:** For best results, do not use a USB storage device with a slow access speed or the movies may not play back correctly. You cannot project files to which DRM (Digital Rights Management) is applied.

**Parent topic:** [Projecting a PC Free Presentation](#)

## Starting a PC Free Slide Show

After connecting a USB device or digital camera to the projector, you can switch to the USB input source and start your slide show.

**Note:** You can change the PC Free operation options or add special effects by highlighting **Option** at the bottom of the screen and pressing **Enter**.

1. Press the **Source Search** button on the projector, remote control, or Control Pad, or tap the Source Select icon on the whiteboard.
2. Select the **USB1** source.
The PC Free screen appears.

3. Do the following as necessary to locate your files:
   • If you need to display files inside a subfolder on your device, press the arrow buttons to highlight the folder and press the **Enter** button.
   • To move back up a folder level on your device, highlight **Back to Top** and press **Enter**.
   • To view additional files in a folder, highlight **Next page** or **Previous page** and press **Enter**, or press the **Page** up or down buttons on the remote control.

4. Do one of the following:
   • To display an individual image, press the arrow buttons to highlight the image and press **Enter**. (Press the **Esc** button to return to the file list screen.)
   • To display a slide show of all the images in a folder, press the arrow buttons to highlight the **Slideshow** option at the bottom of the screen and press **Enter**.

**Note:** If any file names are longer than 8 characters or include unsupported symbols, the file names may be shortened or changed only in the screen display.
5. While projecting, use the following commands to control the display as necessary:
   - To rotate a displayed image, press the up or down arrow button.
   - To move to the next or previous image, press the left or right arrow button.

6. To stop the display, follow the on-screen instructions or press the Esc button.

**Parent topic:** Projecting a PC Free Presentation

**Starting a PC Free Movie Presentation**

After connecting a USB device or digital camera to the projector, you can switch to the USB input source and start your movie.

**Note:** You can change the PC Free operation options by highlighting Option at the bottom of the screen and pressing Enter.

1. Press the Source Search button on the projector, remote control, or Control Pad, or tap the Source Select icon on the whiteboard. Select the USB1 source.

   The PC Free screen appears.
2. Do the following as necessary to locate your files:
   • If you need to display files inside a subfolder on your device, press the arrow buttons to highlight
     the folder and press the Enter button.
   • To move back up a folder level on your device, highlight Back to Top and press Enter.
   • To view additional files in a folder, highlight Next page or Previous page and press Enter, or
     press the Page up or down buttons on the remote control.

3. To play back a movie, press the arrow buttons to highlight the file and press Enter.

   Note: If any file names are longer than 8 characters or include unsupported symbols, the file names
   may be shortened or changed only in the screen display. If you want to play back all the movies in a
   folder in sequence, select the Slideshow option at the bottom of the screen.

4. To stop movie playback, press the Esc button, highlight Exit, and press Enter.

Parent topic: Projecting a PC Free Presentation

Starting a PC Free PDF File Presentation

After connecting a USB device to the projector, you can switch to the USB input source and start your
PDF file presentation.

Note: You cannot do the following while presenting a PDF file from a USB device:
   • Release a password
   • Display e-signatures, JPEG2000 images, transparent effects, 3D artwork, or comments
   • Play multimedia content

1. Press the Source Search button on the projector, remote control, or Control Pad, or tap the Source
   Select icon on the whiteboard. Select the USB1 source.
The PC Free screen appears.

2. Do the following as necessary to locate your files:
   • If you need to display files inside a subfolder on your device, press the arrow buttons to highlight
     the folder and press the Enter button.
   • To move back up a folder level on your device, highlight Back to Top and press Enter.
   • To view additional files in a folder, highlight Next page or Previous page and press Enter.

3. To display the first page of a PDF file at full size, press the arrow buttons to highlight the file and
   press Enter. (Press the Esc button to return to the file list screen.)

   Note: If any file names are longer than 8 characters or include unsupported symbols, the file names
   may be shortened or changed only in the screen display. If a PDF file extension is not .pdf, the file
   does not appear in the file list.

4. While projecting a PDF file, use the following commands to control the display as necessary:
   • To move to the next or previous page, press the up or down arrow button.
• To display a menu of pages to select from, press the **Esc** button. Then press the left or right arrow button to select a page and press **Enter**.

• To enlarge the view of a page to fit the screen, press **Enter**. Press **Enter** again to return to standard size display.

• To rotate a displayed page, press the left or right arrow button.

5. To stop the display, press the **Esc** button, press the up or down arrow button to highlight **EXIT**, and press **Enter**.

Adjusting Projector Features

Follow the instructions in these sections to use your projector's feature adjustments.

Shutting Off the Picture and Sound Temporarily
Stopping Video Action Temporarily
Zooming Into and Out of Images
Scheduling Projector Events
Projector Security Features
Creating a User Pattern to Display

Shutting Off the Picture and Sound Temporarily

You can temporarily turn off the projected picture and sound if you want to redirect your audience’s attention during a presentation. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.

If you want to display an image such as a company logo or picture when the presentation is stopped, you can set up this feature using the projector's menus.

1. Press the A/V Mute button on the remote control to temporarily stop projection and mute any sound.

2. To turn the picture and sound back on, press A/V Mute again.

Parent topic: Adjusting Projector Features
Stopping Video Action Temporarily

You can temporarily stop the action in a video or computer presentation and keep the current image on the screen. Any sound or video action continues to run, however, so you cannot resume projection at the point that you stopped it.

Note: You can also stop video action using the interactive pens.

1. Press the Freeze button on the remote control to stop the video action.

2. To restart the video action in progress, press Freeze again.

Parent topic: Adjusting Projector Features

Zooming Into and Out of Images

You can draw attention to parts of a presentation by zooming into a portion of the image and enlarging it on the screen.

Note: You can also zoom into your image using the interactive pens.
1. Press the **E-Zoom +** button on the remote control.

   ![Remote Control Buttons]

   You see a crosshair on the screen indicating the center of the zoom area.

2. Use the following buttons on the remote control to adjust the zoomed image:
   - Use the arrow buttons to position the crosshair in the image area you want to zoom into.
   - Press the **E-Zoom +** button repeatedly to zoom into the image area, enlarging it as necessary. Press and hold the **E-Zoom +** button to zoom in more quickly.
   - To pan around the zoomed image area, use the arrow buttons.
   - To zoom out of the image, press the **E-Zoom –** button as necessary.
   - To return to the original image size, press **Esc**.

**Parent topic:** Adjusting Projector Features

### Scheduling Projector Events

You can save a projector command, such as turning the projector on or off or switching input sources, as an "event". You can schedule when you want the projector to automatically execute the command.

**Note:** The Time/Schedule Protection setting in the Password Protection menu must be turned off to schedule an event.

**Saving a Scheduled Event**
**Viewing Scheduled Events**
**Editing Scheduled Events**

**Parent topic:** Adjusting Projector Features
Saving a Scheduled Event

You can select projector commands you want to perform and schedule them as an event.

1. Press the **Menu** button.
2. Select the **Extended** menu and press **Enter**.
3. Select the **Time/Schedule Settings** setting and press **Enter**.
   
   The Schedule Settings screen appears.
4. Select the **Schedule** menu and press **Enter**.
5. Select **Add New** and press **Enter**.
6. In the Event Settings section, select the events you want to have occur. (Select **No Change** for events that you do not want to occur.)
7. In the Date/Time Settings section, set the date and time for the scheduled events to occur.
8. When you are finished, select **Save** and press **Enter**.
9. To schedule more events, repeat the previous 4 steps.
10. Select **Setup complete** and select **Yes** to save your changes.

**Parent topic:** Scheduling Projector Events

- Projector Setup Settings - Extended Menu

Viewing Scheduled Events

You can view your scheduled events on the calendar displayed on the Schedule Settings screen.

1. Press the **Menu** button on the remote control or control panel.
2. Select the **Extended** menu.
3. Select **Time/Schedule Settings**.
4. Select **Schedule**.  
The Schedule Settings screen is displayed.

Colored boxes on the calendar indicate the following:

- **One-time event**
- **Repeating event**
- **Communication is on or off**
- **Event is invalid**

5. To view an event, press the left and right arrow buttons on the remote to select a day.

The screen displays the details of the events scheduled for that day. A blue icon indicates an enabled event; a gray icon indicates a disabled event, and the icon indicates a repeating event.

**Parent topic:** [Scheduling Projector Events](#)

**Related references**

- [Projector Setup Settings - Extended Menu](#)

**Editing Scheduled Events**

You can edit your scheduled events on the calendar displayed on the Schedule Settings screen.

1. Press the **Menu** button on the remote control or control panel.
2. Select the **Extended** menu.
3. Select **Time/Schedule Settings**.
4. Select **Schedule**.

The Schedule Settings screen is displayed.

![Schedule Settings Screen](image)

Colored boxes on the calendar indicate the following:

- **Blue**: One-time event
- **Red**: Repeating event
- **Green**: Communication is on or off
- **Gray**: Event is invalid

5. To edit an event, press the up and down arrow buttons on the remote to highlight an event.

   **Note**: While an event is selected, pressing the **Esc** button will enable or disable the event.

6. Press the **Esc** button and choose an option.
   - **On/Off**: Enables or disables the event
   - **Edit**: Edits the settings for the event
   - **Clear**: Deletes the event

7. Select **Edit** and change the settings for the event.
8. Select **Save**.

   You see the new event on the Schedule screen.

**Parent topic**: Scheduling Projector Events
Projector Security Features

You can secure your projector to deter theft or prevent unintended use by setting up the following security features:

- **Password security** to prevent the projector from being turned on, and prevent changes to the startup screen and other settings.
- **Button lock security** to block operation of the projector using the buttons on the control panel.
- **Security cabling** to physically cable the projector in place.

Password Security Types

Password Security Types

- **Power On Protection** password prevents anyone from using the projector without first entering a password.
- **User’s Logo Protection** password prevents anyone from changing the custom screen the projector can display when it turns on or when you use the A/V Mute feature. The presence of the custom screen discourages theft by identifying the projector’s owner.
- **Network Protection** password prevents anyone from changing the network settings in the projector menus.
- **Time/Schedule Protection** password prevents anyone from changing the projector’s time or schedule settings.

Password Security Types

Password Security Types

Setting a Password

Selecting Password Security Types

Entering a Password to Use the Projector

Saving a User’s Logo Image to Display

Parent topic: Projector Security Features
Setting a Password

To use password security, you must set a password.

1. Hold down the **Freeze** button on the remote control for about ten seconds or until you see this menu.

   ![Password Protection Menu]

   - **Power On Protection**
   - **User's Logo Protection**
   - **Network Protection**
   - **Time/Schedule Protection**
   - **Password**

2. Press the down arrow to select **Password** and press **Enter**.
   You see the prompt “Change the password?”.

3. Select **Yes** and press **Enter**.

4. Press and hold down the **Num** button on the remote control and use the numeric buttons to set a four-digit password.

   ![Numeric Buttons]

   The password displays as **** as you enter it. Then you see the confirmation prompt.

5. Enter the password again.
   You see the message “Password accepted.”

6. Press **Esc** to return to the menu.
7. Make a note of the password and keep it in a safe place in case you forget it.

Parent topic: Password Security Types

Selecting Password Security Types

After setting a password, you see this menu, allowing you to select the password security types you want to use.

If you do not see this menu, hold down the Freeze button on the remote control for five seconds until the menu appears.

2. To prevent changes to the User's Logo screen or related display settings, select User's Logo Protection, press Enter, select On, press Enter again, and press Esc.
3. To prevent changes to network settings, select Network Protection, press Enter, select On, press Enter again, and press Esc.
4. To prevent changes to the projector's time or schedule settings, select Time/Schedule Protection, press Enter, select On, press Enter again, and press Esc.

You can attach the Password Protect sticker to the projector as an additional theft deterrent.

Note: Be sure to keep the remote control in a safe place; if you lose it, you will not be able to enter the password required to use the projector.

**Entering a Password to Use the Projector**

If a password is set up and a **Power On Protection** password is enabled, you see a prompt to enter a password whenever you turn on the projector.

If a password is set up and a **Power On Protection** password is enabled, you see a prompt to enter a password whenever you turn on the projector.

You must enter the correct password to use the projector.

1. Press and hold down the **Num** button on the remote control while you enter the password using the numeric buttons.
The password screen closes.

2. If the password is incorrect, the following may happen:
   • You see a "wrong password" message and a prompt to try again. Enter the correct password to proceed.
   • If you enter an incorrect password several times in succession, the projector displays a request code and a message to contact Epson Support. When you contact Epson Support, provide the displayed request code and proof of ownership for assistance in unlocking the projector.

Saving a User's Logo Image to Display

You can transfer an image to the projector and then display it whenever the projector turns on. You can also display the image when the projector is not receiving an input signal or when you temporarily stop projection (using the A/V Mute feature). This transferred image is called the User's Logo screen.

The image you select as the User's Logo can be a photo, graphic, or company logo, which is useful in identifying the projector's owner to help deter theft. You can prevent changes to the User's Logo by setting up password protection for it.

1. Display the image you want to project as the User's Logo.
2. Press the Menu button, select the Extended menu, and press Enter.
3. Select the **User’s Logo** setting and press **Enter**.
   You see a prompt asking if you want to use the displayed image as a user’s logo.

4. Select **Yes** and press **Enter**.
   You see a selection box overlaying your image.

5. Use the arrow buttons on the remote control to surround the image area you want to use as the User’s Logo and press **Enter**.
   You see a prompt asking if you want to select this image area.

6. Select **Yes** and press **Enter**. (If you want to change the selected area, select **No**, press **Enter**, and repeat the last step.)
   You see the User’s Logo zoom factor menu.

   ![User's Logo zoom factor menu](image)

7. Select a zoom percentage and press **Enter**.
   You see a prompt asking if you want to save the image as the User’s Logo.

8. Select **Yes** and press **Enter**.

   **Note:** It takes a few moments for the projector to save the image; do not use the projector, its remote control, or any connected equipment until it is finished.

   You see a completion message.

9. Press **Esc** to exit the message screen.

10. Select the **Extended** menu and press **Enter**.

11. Select **Display** and press **Enter**.
12. Select when you want to display the User's Logo screen:
   • To display it whenever there is no input signal, select **Display Background** and set it to **Logo**.
   • To display it whenever you turn the projector on, select **Startup Screen** and set it to **On**.
   • To display it whenever you press the **A/V Mute** button, select **A/V Mute** and set it to **Logo**.

To prevent anyone from changing the User's Logo settings without first entering a password, set a password and enable User's Logo security.

### Locking the Projector's Buttons

You can lock the buttons on the projector's control panel to prevent anyone from using the projector. You can lock all the buttons or all the buttons except the power button.

1. Press the **Menu** button.
2. Select the **Settings** menu and press **Enter**.
3. Select the **Control Panel Lock** setting and press **Enter**.
4. Select one of these lock types and press **Enter**:
   • To lock all of the projector's buttons, select **Full Lock**.
• To lock all buttons except the power button, select **Partial Lock**.

You see a confirmation prompt.

5. Select **Yes** and press **Enter**.

**Unlocking the Projector’s Buttons**

**Parent topic:** [Projector Security Features](#)

## Unlocking the Projector’s Buttons

If the projector’s buttons have been locked, hold the **Enter** button on the projector’s control panel for seven seconds to unlock them.

**Parent topic:** [Locking the Projector’s Buttons](#)

## Installing a Security Cable

You can install two types of security cables on the projector to deter theft.

- Use the security slot on the projector to attach a Kensington Microsaver Security system, available from Epson.

- Use the security cable attachment point on the projector to attach a wire cable and secure it to a room fixture or heavy furniture.

**Note:** Do not pass drop-prevention cables through the security cable attachment point when mounting the projector on a wall or ceiling.

**Parent topic:** [Projector Security Features](#)
Creating a User Pattern to Display

You can transfer an image to the projector and then display it as a pattern to aid in presentations when you use the Pattern Display feature. This transferred image is called the User Pattern.

1. Display the image you want to project as the User Pattern from a connected computer or video source.
2. Press the **Menu** button, select the **Settings** menu, and press **Enter**.
3. Select the **Pattern** setting and press **Enter**.
4. Select the **User Pattern** setting and press **Enter**.
   
   You see a prompt asking if you want to use the displayed image as a User Pattern.

5. Select **Yes** and press **Enter**.

   **Note:** It takes a few moments for the projector to save the image; do not use the projector, its remote control, or any connected equipment until it is finished.

   You see a completion message.

6. Press **Esc** to exit the message screen.

Using the Interactive Features

Follow the instructions in these sections to use your projector's interactive features.

Interactive Modes
Using the Interactive Pens
Using Finger Touch Interactivity
Using BrightLink With a Computer
Whiteboard Mode
Annotation Mode (PC Free)
Splitting the Screen

Interactive Modes

The BrightLink interactive features turn any wall into an interactive whiteboard, either with or without a computer. These interactive modes are available:

• In whiteboard mode, you can use one or both interactive pens or your finger (BrightLink Pro 1430Wi) to write on the projected "whiteboard". You can split the screen and interact with the whiteboard and another source. You can insert images from a thumbdrive or scanner and save, print, or email your "pages," without connecting a computer.

• In annotation mode (PC Free Annotation), you can annotate over content projected from a computer, tablet, document camera, or other source. You can capture your annotated pages, then save or print them. You can even split the screen and annotate on two images at the same time, using one or both pens.

• In PC Interactive mode, you can use the interactive pen or your finger (BrightLink Pro 1430Wi) as a mouse to navigate, select, and scroll through content from your computer. You can split the screen and interact with two projected images at the same time.

Note: You can also use the Easy Interactive Tools software to provide additional interactive features, such as saving your annotations and printing them. See the online Easy Interactive Tools Operation Guide for detailed instructions.

Using the Pens

Your projector came with a blue pen and an orange pen, identified by the color on the end of the pen. You can use either pen, or both pens at the same time (one of each color), with Easy Interactive Tools. Make sure the pen batteries are installed.
**Note:** The pen turns off automatically after 20 minutes of inactivity. Tap the pen tip or press the button on the side to turn the pen back on.

1. Pen tip
2. Battery light
3. Power/function button
4. Attachment for optional strap or cord
5. Battery cover

- To turn on the pen, tap the pen tip or press the power/function button.

**Note:** If you press the button, the battery light flashes briefly, then turns off. If the battery is low, the battery light flashes continuously.
• For best performance, hold the pen perpendicular to the board, as shown below. Do not cover the black section near the tip of the pen.

To write or draw on the projection surface in annotation mode or whiteboard mode, do the following:

• To select a projected item, such as an icon, tap the projection surface with the pen tip.
• To draw on the projected screen, tap the projection surface with the pen and drag it as necessary.
• To move the pointer, hover over the surface without touching it.
• To switch the pen from drawing tool to eraser, press the power/function button on the side.
To use the pen as a mouse in PC Interactive mode, do the following:

- To left-click, tap the board with the pen tip.
- To double-click, tap twice.
- To right-click, press the power/function button on the side.
- To click and drag, tap and drag with the pen.
- To move the cursor, hover over the board without touching it.

**Note:** If you do not want to use the hovering feature, you can turn it off using the *Easy Interactive Function* setting in the projector's Extended menu.

**Parent topic:** Using the Interactive Pens

**Related concepts**

- Whiteboard Mode
- Using BrightLink With a Computer

**Pen Calibration**

Calibration coordinates the position of the pen with the location of your cursor. You only need to calibrate the first time you use your projector's interactive features. Calibration results remain until you calibrate again.

Be sure to calibrate the pen before performing finger touch calibration (BrightLink Pro 1430Wi).

If you notice positioning discrepancies after doing any of the following, calibrate again:

- Performing Keystone correction
- Adjusting the image size
• Using the Image Shift feature
• Moving the projector

Note: Move any pen you are not using away from the projection screen while calibrating.

Adjusting the Image Position

Calibrating Automatically

You do not need the pens or a computer for Auto Calibration.

Note: You can start Auto Calibration by pressing the User button on the remote control or by pressing the Menu button on the remote control as described here.

1. Press the Menu button, select the Extended menu, and press Enter.
2. Select the **Easy Interactive Function** setting and press **Enter**.

3. Select **Auto Calibration** and press **Enter**.

4. Adjust the image focus, if necessary.

5. Press **Enter** to select **Yes**.

A pattern appears then disappears, and the system is calibrated. If you see a message that calibration failed, you need to calibrate manually.
The cursor location and pen position should match after calibration. If not, you may need to calibrate manually.

**Parent topic:** Pen Calibration

**Calibrating Manually**

If the cursor location and pen position do not match after auto calibration, you can calibrate manually.

1. Press the **Menu** button, select the **Extended** menu, and press **Enter**.

2. Select the **Easy Interactive Function** setting and press **Enter**.
3. Select **Manual Calibration** and press **Enter**.

4. Adjust the image focus, if necessary.

5. Press **Enter** to select **Yes**.
   A flashing green circle appears in the upper left corner of your projected image.

6. Touch the center of the circle with the tip of the pen.
   The circle disappears, and you see another circle below the first one.
**Note:** For the most accurate calibration, make sure you touch the center of the circle.

7. Touch the center of the next circle, then repeat. When you get to the bottom of the column, the next circle appears at the top of a new column.

**Note:** Make sure you are not blocking the signal between the pen and the interactive receiver (next to the projection window on the projector).

If you make a mistake, press the **Esc** button on the remote control to go back to the previous circle. To restart the calibration process, press and hold the **Esc** button for 2 seconds.

8. Continue until all of the circles disappear.

**Parent topic:** Pen Calibration
Using Finger Touch Interactivity

You can use your finger to perform the same functions as the interactive pens when you install the Touch Unit (BrightLink Pro 1430Wi).

**Note:** See the *Installation Guide* for detailed instructions on installing the Touch Unit.

Adjusting the Angle of the Touch Unit

**Touch Unit Safety Instructions**

The Touch Unit enables finger touch interactivity with your projector (BrightLink Pro 1430Wi). Do not connect it to any other projectors or devices.

A built-in, high-power laser is emitted from the laser diffusion ports on the back of the Touch Unit.
Follow these precautions when using the Touch Unit and finger touch interactivity:

- Children using finger touch interactivity should always be accompanied by an adult.
- Never disassemble or modify the Touch Unit.
- Do not look into the laser diffusion ports on the back of the Touch Unit. The laser can damage your eyes. Extra care should be taken when children are present.
- Do not allow the laser light from the Touch Unit to pass through or be reflected by any optical devices, such as a magnifying glass or mirror. This could cause personal injury or fire.
- Do not view the laser light from the Touch Unit using an optical device such as an eye loupe, magnifying glass, or microscope, especially within 2.75 inches (70 mm) of the laser diffusion ports. This could damage your eyes.
- Unplug the projector from the electrical outlet and refer all repairs to qualified service personnel if any problems occur with the Touch Unit.

The Touch Unit is a Class 1 laser product that complies with IEC/EN60825-1:2007. The labels indicating the Class 1 laser product and warnings are located in the following areas on the Touch Unit:
Calibrating for Finger Touch Interactivity

Finger touch calibration coordinates the positioning of your finger with the location of the cursor (BrightLink Pro 1430Wi).

**Note:** Make sure you have calibrated the pens before calibrating for finger touch interactivity.

1. Press the **Menu** button, select the **Extended** menu, and press **Enter**.

![Menu Screen](image-url)
2. Select the **Easy Interactive Function** setting and press **Enter**.

![Image of Easy Interactive Function setting]

3. Select **Touch Unit Setup** and press **Enter**.

![Image of Touch Unit Setup setting]

4. Select **Touch Calibration** and press **Enter**.
The following screen appears:

5. Adjust the image focus, if necessary.
6. Press **Enter** to select **Yes**.
   
   A flashing green circle appears in the upper left corner of your projected image.

7. Touch and hold the center of the circle with your finger until the circle disappears and another circle appears, then release it.

   The circle disappears, and you see another circle below the first one.
Note: For the most accurate calibration, make sure you touch the center of the circle with the tip of your finger.

Note: Make sure you are not blocking the signal between your finger and the interactive receiver (next to the projection window on the projector).

8. Touch the center of the next circle with your finger and continue until all of the circles disappear. When you get to the bottom of a column, the next circle appears at the top of a new column.

Note: If you make a mistake, press the Esc button on the remote control to go back to the previous circle. To restart the calibration process, press and hold the Esc button for 2 seconds.

9. If the cursor location and your finger position do not match, repeat these steps to calibrate again.
Using Finger Touch Operations

You can use your finger to interact with the projected screen, just as you would use an interactive pen (BrightLink Pro 1430Wi). You can use either a pen or your finger, or use both at the same time.

When performing touch operations with your finger, you can use two fingers in annotation and whiteboard modes.

1. Calibrate the pens.
2. Install the Touch Unit as described in your mount's Installation Guide.
3. Adjust the angle of the Touch Unit if it was not adjusted during installation.
4. Calibrate for finger touch interactivity.
5. Turn on your projector. This automatically turns on the Touch Unit also.

The blue light on the Touch Unit remains lit.
6. To write or draw on the projection surface in annotation mode or whiteboard mode, do the following:

- To select a projected item, such as an icon, tap the projection surface with your finger.
- To draw on the projected screen, tap the projection surface with your finger and drag it as necessary.

7. To use your finger as a mouse in PC Interactive mode, do the following:

- To left-click, tap the board with your finger.
- To double-click, tap twice with your finger.
- To right-click, press the board with your finger for about 3 seconds.
- To click and drag, press on and drag an item with your finger.
- To scroll, drag your finger on the screen.

8. If your operating system supports these functions, you can also do the following:

- To zoom in or out, touch an item using two fingers and either move your fingers away from each other (zoom in) or toward each other (zoom out).
- To rotate an image, touch the image with your fingers and rotate your hand.
To drag up or down on a page, or move backward or forward in a browser window, use swiping gestures or flicks.

**Note**: Finger touch operations may not work correctly with long or artificial nails, or fingers wearing bandages. If your fingers are too close together or crossed, or your sleeve touches the screen, finger touch may not be recognized. Some operating systems may not support gestures.

Easy Interactive Tools

Switching to PC Interactive Mode

You can easily switch between PC Free annotation and PC interactive modes. Although you can use both pens in PC interactive mode, this may cause interference in some applications that only support one pen. To avoid interference, turn off the unused pen or move it away from the projection surface.

- To switch to PC interactive mode, select the Pen mode icon on the toolbar, then select the Mouse icon.

- To switch back to annotation mode, select the Mouse icon, then select the Pen mode icon.

Parent topic: Using BrightLink With a Computer
Controlling Computer Features from a Projected Screen (PC Interactive Mode)

You can navigate, select, and interact with your computer programs from the projected screen using the interactive pens or your finger (BrightLink Pro 1430Wi) just as you would a mouse.

**Note:** OS X users need to install the Easy Interactive Driver before using PC Interactive mode. Go to epson.com/support (U.S.) or epson.ca/support (Canada) and select your projector.

1. Connect the projector to your computer using a USB cable.
2. Turn on your projector and project your computer screen.
3. Press the **Menu** button on the remote control, select the **Extended** menu, and press the **Enter** button.
4. Select the **USB Type B** setting and press the **Enter** button.
5. Select one of the following:
   - **Easy Interactive Function** to use PC Interactive mode.
   - **USB Display/Easy Interactive Function** to use PC Interactive mode and USB Display.
   - **Wireless Mouse/USB Display** to use the mouse and USB Display.
6. Press the **Esc** button to exit the USB Type B menu.
7. Select the **Easy Interactive Function** setting and press the **Enter** button.

8. Select one of the following as the **Pen Operation Mode** depending on your projector model and computer operating system (BrightLink Pro 1430Wi):

   BrightLink Pro 1420Wi:
   - **Two Users/Mouse**: Lets you use both interactive pens as a mouse
   - **One User/Mouse**: Lets you use one interactive pen as a mouse
   - **One User/ Pen**: Uses the Windows pen and ink feature (Windows 8.x, Windows 7, and Windows Vista)

   BrightLink Pro 1430Wi:
   - **Mode 1**: Windows XP or earlier
   - **Mode 2**: Windows Vista, Windows 7, Windows 8.x, and OS X
   - **Mode 3**: Linux

9. Press the **Enter** button on the remote control and press the **Menu** button to exit the Extended menu.

10. Hover near or tap on the board or the projected image with the interactive pen or your finger (BrightLink Pro 1430Wi).

    The **icon is displayed on the projected screen.**
11. Select the icon, then select the icon.

You can now operate the computer using the interactive pens or your finger (BrightLink Pro 1430Wi).

**Parent topic:** Using BrightLink With a Computer

### Adjusting the Pen Operation Area

If you connect a different computer or adjust the computer's resolution, the pen operation area is adjusted automatically to match your mouse pointer position. If you intend to only use a single computer with the projector, set **Auto Adjust Pen Area** to **Off**. If you will be using many computers with the projector, set **Auto Adjust Pen Area** to **On**. If you notice that the pen position is incorrect when using PC Interactive mode, you can adjust the pen area manually.

**Note:** Manual adjustment is not available when projecting from a LAN source.

1. Project your computer's desktop.
2. Press the **Menu** button, select the **Extended** menu, and press **Enter**.
3. Select the **Easy Interactive Function** setting and press **Enter**.

4. Select **Advanced** in the PC Interactive section and press **Enter**.

5. Select **Manual Adj. Pen Area** and press **Enter**.
You see this screen:

6. Press **Enter** to select **Yes**.
   The mouse pointer moves toward the top left corner.
7. When the mouse pointer stops at the top left corner of the image, touch the tip of the pointer with the interactive pen.
   The mouse pointer moves toward the bottom right corner.
8. When the mouse pointer stops at the bottom right corner of the image, touch the tip of the pointer with the interactive pen.

**Parent topic:** Using BrightLink With a Computer

## Easy Interactive Tools

Your projector came with a CD containing the Easy Interactive Tools software for use with a computer. Easy Interactive Tools lets you use your interactive pen or finger (BrightLink Pro 1430Wi) as a mouse to navigate, select, scroll, draw, save, and interact with projected content from your computer.

These two modes are available:

- **Annotation (interactive)** mode displays the toolbar on the projected image and lets you use the pen or finger (BrightLink Pro 1430Wi) as a mouse to open applications, access links, and operate scroll bars, for example (using one pen at a time). You can also annotate whatever is displayed from your computer (using both pens at the same time).
- **Whiteboard** mode lets you project on one of 3 solid colors or 6 background patterns, and use the toolbar to write or draw on the background. You can also import images from your computer or a document camera. In full screen whiteboard mode, two people can use the pens at the same time. Finger touch is also available in whiteboard mode. (BrightLink Pro 1430Wi)

**Note:** For detailed instructions on using the Easy Interactive Tools software, see the online *Easy Interactive Tools Operation Guide* or the online help.
Windows Pen Input and Ink Tools

If you are using Windows 8.x, Windows 7, or Windows Vista, you can use the pen input and Ink tools to add input and annotations to your work. You can also use these features over a network when you set the interactive features to be available on your network. See the *EasyMP Network Projection Operation Guide* for instructions on setting up your computer for network projection.

Enabling Windows Pen Input and Ink Tools
Using Windows Pen Input and Ink Tools
Parent topic: Using BrightLink With a Computer

Enabling Windows Pen Input and Ink Tools

To use the pen input and Ink tools in Windows 8.x, Windows 7, or Windows Vista, you need to adjust the pen operation mode in your projector's menus.

1. Press the **Menu** button, select the **Extended** menu, and press **Enter**.
2. Select the **Easy Interactive Function** setting and press **Enter**.

3. Select **Pen Operation Mode** and press **Enter**.

4. Select one of the following:
   - **One User/Pen** (BrightLink Pro 1420Wi)
   - **Mode 1** or **Mode 2** when using Ink tools (BrightLink Pro 1430Wi); this also lets you use Windows multi-touch features
• **Mode 2** when using pen input (BrightLink Pro 1430Wi)

**Parent topic:** Windows Pen Input and Ink Tools

### Using Windows Pen Input and Ink Tools

If you are using Windows 8.x, Windows 7, or Windows Vista, you can add handwritten input to your work and convert it to text.

If you have Microsoft Office 2003 or later, you can also use the Ink function to add handwritten notes to a Word document, Excel spreadsheet, or PowerPoint presentation.

**Note:** Option names for the annotation functions may vary depending on your version of Microsoft Office.

• To open the Touch Keyboard in Windows 8.x, right-click or tap-and-hold on the Taskbar, and select **Toolbars > Touch Keyboard**. Select the keyboard icon on the screen and select the pen icon.

• To open the Tablet PC input panel in Windows 7 or Windows Vista, select **> All Programs > Accessories > Tablet PC > Tablet PC Input Panel**.

You can write in the box using the interactive pen or your finger (BrightLink Pro 1430Wi), and select from a variety of options to edit and convert the text.

• To add Ink annotations in Microsoft Office applications, select the **Review** menu, and select **Start Inking**.

**Note:** In Microsoft Word or Excel, select the **Insert** tab and select **Start Inking**.
• To annotate your PowerPoint slides in Slideshow mode, press the button on the side of the interactive pen or press the projection surface with your finger (BrightLink Pro 1430Wi) for about 3 seconds, and select **Pointer Options > Pen** from the pop-up menu.

**Note:** This also works in Windows XP Tablet PC Edition.

For more information about these features, see Windows Help.

**Parent topic:** Windows Pen Input and Ink Tools

### Whiteboard Mode

You can use the pens or your finger (BrightLink Pro 1430Wi) to write or draw on the projection surface just as you would on a chalkboard or dry erase board.

You can also do the following:
- Insert images from a thumbdrive or scanner and resize, rotate, or crop the images
- Insert a background pattern or template, or a variety of shapes
- Save, print, or email your whiteboard pages

**Using the Whiteboard Toolbars**
**The Main Whiteboard Toolbar**

**Parent topic:** Using the Interactive Features
Using the Whiteboard Toolbars

You can use both pens at the same time in whiteboard mode.

1. Press the **Whiteboard** button on the remote control or control pad.
   You see the whiteboard screen, with the main toolbar and the bottom toolbar:

   ![Whiteboard Screen with Toolbars](image)

2. To move the main toolbar to the other side of the screen, select the arrow.
   
   **Note:** You can use the pen or your finger (BrightLink Pro 1430Wi) to move the arrow up or down.

3. To add a new page, select the **New page** icon on the bottom toolbar.
   Your current page appears as a thumbnail image on the bottom toolbar.

4. To close the main toolbar, select the icon at the bottom of the toolbar.
   
   **Note:** If you want to hide the toolbar automatically after drawing, select the icon at the bottom of the toolbar.

5. To show or hide the bottom toolbar, select one of the arrows.
The Main Whiteboard Toolbar

The main whiteboard toolbar lets you draw, write, and insert images and backgrounds. The toolbar also lets you easily switch to PC Free annotation or computer interactive mode.

<table>

Selecting Background Templates

In whiteboard mode, you can insert horizontal lines, a graph-paper grid, or another background template and place it on your whiteboard pages. You can select from 10 pre-installed patterns or add up to 5 custom templates by accessing the projector through your web browser.

1. In whiteboard mode, select the Template tool on the bottom toolbar. You see the available templates.
2. Select one of the template patterns.
3. If you want to use the pattern for all the pages in the current session, select **Apply to all pages**.
4. To scale the pattern, select the pattern repeatedly to cycle through the different scales.

**Note:** Not all patterns will scale.

Parent topic: Whiteboard Mode
Zooming Images in Whiteboard Mode

You can use the pen to zoom in and pan around your enlarged image, then zoom out when you are done.

1. Select the Zoom tool on the bottom toolbar.
2. Do one of the following to adjust the image if necessary:
   • Select the plus icon to enlarge the image.
   • Select the minus icon to shrink the image.
   • Select the x1 icon to return to the original size.
   • Press and drag on the screen to pan around the enlarged area.

Inserting and Working With Images

In whiteboard mode, you can use the Insert Image tool to insert an image from a thumbdrive or a network folder. Images can be in .png or .jpg format, with a maximum size of 2048 × 2048 pixels. Once the image is projected, you can move, resize, rotate, or crop it.

Note: You can also use the tool on the bottom toolbar to import files (including pdf files) in whiteboard mode.

1. Select the Insert Image tool.
2. Select the image you want to add, then select Insert Image.
   After a moment, the image appears on the whiteboard page.
3. Once you have selected the image, select either the Rectangle Select or Free Select tool and do any of the following as necessary:
   • To move the image, touch inside it and drag with the pen.
   • To resize the image, touch any corner and drag inward to shrink or outward to enlarge.
   • To rotate the image, touch the round icon at the top of the image and drag left or right.
   • To crop the image, select and drag the side of the image.

4. The menu in the bottom right corner of the image allows you to:
   • **Cut**: removes the image from the whiteboard. Tap a location on the screen to paste the image again.
   • **Copy**: touch a location on the screen and paste a copy of the image
   • **Paste**: create a new selected copy of the image. Drag the image to the desired location.
   • **Auto Crop**: removes any black borders around the selected image
   • **Delete**: removes the image from the whiteboard

After you have edited the image, select another tool from the whiteboard toolbar to exit image edit mode.

Selecting Whiteboard Settings

Follow the instructions in these sections to select settings for capturing, scanning, saving, printing, and emailing in whiteboard mode.

**Selecting Basic Whiteboard Settings and Policies**

You can select the whiteboard features you want to use and control the way whiteboard pages are saved in the projector.
1. Press the **Menu** button on the remote control.
2. Select the **Extended** menu and press **Enter**.

3. Select **Whiteboard Settings** and press **Enter**.
4. Select **Basic** and press **Enter**.
5. Select the following basic options as necessary:
   - **Administrator Password** lets you enter a password up to 16 alphanumeric characters long for controlling whiteboard settings. This password is also used for network settings.
   - **Clock Display Settings** lets you control the date and time display on the bottom whiteboard toolbar.
   - **Keyboard Layout** lets you select the onscreen keyboard layout.
   - **Delete All Internal Data** lets you delete data stored in the projector. Use this option if you have problems with internal storage, or you need to dispose of the projector or have it repaired.

   **Note:** Use the displayed keyboard to enter the password. Press the arrow buttons on the remote control to highlight characters and press **Enter** to select them.

6. Select the **Policy** menu and press **Enter**.

7. Select the following policy options as necessary:
   - **Policy Setting** options let you disable capturing, printing, scanning, USB storage, network storage, or emailing from the projector. All features are enabled by default.
   - **Template Settings** lets you control how the user templates can be changed. When **Protect User Templates** is set to **On**, the user templates can only be changed through the web browser interface. When set to **Off**, the user templates can be edited in whiteboard mode.
   - **Internal Storage** settings let you control the use of the projector's internal storage. In most cases, you should leave this setting **On**, and select **Retain** for saved data. The **Backup Time for Saved**
Data setting determines how often whiteboard pages are backed up automatically in case of a power outage.

8. When you finish selecting settings, select Setup Complete and follow the on-screen instructions to save your settings and exit the menus.

Selecting Whiteboard Print Settings

You can select the default settings for printing whiteboard pages from the projector.

1. Press the Menu button on the remote control.
2. Select the Extended menu and press Enter.
4. Select Print and press Enter.

5. Select the following printing options as necessary:
   - **Default Printer** lets you select either USB or Network for the printer connection. You can change this setting when you print in whiteboard mode, but not in annotation mode.
     
     **Note:** Selecting USB will also enable scanning from Epson All-in-One printers.
   - **Paper Size** lets you select either Letter or A4 as the default paper size.
   - **Network Printer Settings** let you enter the print job user name and IP address for a printer connected to the same network as the projector. Once this is set, you can select Get printer information to have the projector communicate with the printer and automatically determine the printer type. You can also select the Printer Type manually.
   - **Test Print** lets you send a test page to the connected printer.
     
     **Note:** Use the displayed keyboard to enter the IP address if necessary. Press the arrow buttons on the remote control to highlight numbers and press Enter to select them.

6. When you finish selecting settings, select Setup Complete and follow the on-screen instructions to save your settings and exit the menus.

**Parent topic:** Selecting Whiteboard Settings
Selecting Settings for Saving Whiteboard Pages

You can select the default settings for saving whiteboard pages from the projector.

1. Press the **Menu** button on the remote control.
2. Select the **Extended** menu and press **Enter**.
3. Select **Whiteboard Settings** and press **Enter**.
4. Select **Save** and press **Enter**.

5. Select the following options for saving as necessary:

   - **Default Save Location** lets you select either **USB** or **Network** for saving on a USB thumb drive or network folder. You can change this setting when you save in whiteboard mode, but not in annotation mode.

   - **UNC Address** (Universal Naming Convention) lets you set a folder and path in the following format: `\host name\share name`. You can use an IP address or a NetBIOS name as the host name. You can enter up to 63 alphanumeric characters for the address.

     When an IP address is set as the host name, the projector communicates with the file sharing server using the CIFS protocol. If a routing configuration is used for the TCP protocol, the subnet is skipped and communication is performed outside the subnet.

     When a NetBIOS name is set as the host name, the projector communicates with the file sharing server using the SMB protocol.

     **Note:** The folder must be on a shared network drive. To save to a folder on a different network segment, use the **WINS server** setting on the wired or wireless network menu.
• **User name** lets you set the user name with read/write privileges on the network folder. You can enter up to 64 alphanumeric characters. You can enter a domain name by adding it before the user name and separating them with a backslash (domain\username).

• **Password** lets you enter a password for the user name. You can enter up to 64 alphanumeric characters. After you enter the password and select **Setup complete**, the password is hidden.

• **Check Connection** lets you test the network connection.

**Note:** Use the displayed keyboard to enter the address, user name, and password if necessary. Press the arrow buttons on the remote control to highlight numbers and press **Enter** to select them.

6. When you finish selecting settings, select **Setup Complete** and follow the on-screen instructions to save your settings and exit the menus.

**Parent topic:** Selecting Whiteboard Settings

Selecting Settings for Emailing Whiteboard Pages

You can select the settings for emailing whiteboard pages from the projector.

1. Press the **Menu** button on the remote control.
2. Select the **Extended** menu and press **Enter**.

3. Select **Whiteboard Settings** and press **Enter**.
4. Select **Mail** and press **Enter**.

![Image of Mail settings](image)

5. Select the following options for emailing as necessary:

   - **SMTP Server** let you enter the IP address or host name for the mail server. You can enter up to 63 alphanumeric characters. If you specify a host name, you must configure a DNS server.

     **Note:** You cannot use the following IP addresses: 127.x.x.x, 192.0.2.x, or 224.0.0.0 to 255.255.255.255.

   - **Authentication** lets you set the type of authentication expected by the mail server
   - **Port Number** lets you enter a port number for the SMTP server. The default port is 25.
   - **User name** lets you enter a user name for the mail server. You can enter up to 64 alphanumeric characters.
   - **Password** lets you enter a password for the mail server. You can enter up to 64 alphanumeric characters.
   - **From** lets you enter the email address to be displayed to the sender. You can enter up to 64 alphanumeric characters.
   - **Default e-mail address** lets you enter an optional address for testing. You can enter up to 64 alphanumeric characters.
- **Send a test e-mail** connects to the SMTP server and sends a test email to the address you set as the default.

**Note:** Use the displayed keyboard to enter the addresses. Press the arrow buttons on the remote control to highlight numbers or characters and press Enter to select them. You cannot use spaces in the **User Name** and **Password** fields. You cannot use spaces or the following symbols: " * + , ; < = > ? [ ] | in the **Reply to** and **From** fields.

6. When you finish selecting settings, select **Setup Complete** and follow the on-screen instructions to save your settings and exit the menus.

### Inserting a Document or Image From a Scanner

You can scan a paper document into a new page in whiteboard mode. Make sure a supported Epson all-in-one printer is connected to the control pad (or to your network).

**Note:** Standalone scanners are not supported.

1. Place your document on the scanner glass or in the automatic document feeder (if available).

   **Note:** You can place up to 10 sheets in the ADF. If you want to scan a longer document, scan the pages in batches of 10.

2. Select the ![Scan tool] Scan tool on the bottom toolbar.
You see the Scan screen:

3. Select the following settings:
   - Select Color or Monochrome
   - Select the orientation for the scanned document.
   - Under ADF, select On if you placed your document in the automatic document feeder.
4. Select Advanced to access additional options.
5. Select Scan on the Scan screen.
   After a moment, you see your document or image on the screen.

   Note: Multi-page documents appear on multiple whiteboard pages.

## Saving Pages in Whiteboard Mode

You can save your pages as .png, .ewf, or .pdf files and select the location (network folder or thumbdrive) where you want to store your files.

1. Press the **Save** button on the control pad or remote control, or select the **Save** tool on the bottom toolbar.

2. Select the location where you want to save your file, then select **OK**.

You see a screen like the following:

![Save Screen](image)

3. To enter a file name, select the **File Name** text box.

The on-screen keyboard appears.

4. Use the keyboard to enter a file name, then select **OK**.
5. Select the location where you want to save the file by selecting the **Location** field. Choose either a USB or Network location and navigate to the target folder, then select **OK**.

6. If sharing the whiteboard, select **Distribute to all participants** to temporarily save the file and make it available for download through a web browser. After the file is downloaded, it is erased.

7. Select the format for saving. If you choose **PDF** or EWF (Epson Whiteboard Format), you can encrypt the file and add a password. If you choose EWF, you can reopen the file later and continue editing.

8. Select one of the following under **Range**:
   - **All** to save all the pages in the current whiteboard session (available for PDF or EWF format only)
   - **Current** to save only the current whiteboard page
   - **Selection** if you want to save a range of pages. Tap the numbers in the boxes to select the range of pages (available for PDF or EWF format only).

9. When you are ready, select **Save**.

**Working With Thumbnail Pages**

Thumbnail pages are displayed on the bottom toolbar in whiteboard mode. You can scroll through your pages with the pen or your finger (BrightLink Pro 1430Wi), select a page to display at full size, and copy or delete individual pages. The 5 rectangles in the center of the bottom toolbar shown here are thumbnail pages:

1. To display a page at full size, select its thumbnail.

2. To scroll through the thumbnail pages, select ◀️ to move to the previous page or ▶️ to move to the next page.
3. Do any of the following as necessary:

- To add a new page, select the New page icon. A blank page opens, and this page appears as the current thumbnail on the bottom toolbar.

- To duplicate the current page, select the icon. The duplicate page appears after the last page displayed.

- To delete the current page, select the Delete icon.
- To change the order of the pages, select and hold a thumbnail for three seconds, then drag the thumbnail to the new location.

Printing in Whiteboard Mode

You can print your pages directly from the projector to a supported printer (USB or networked). You can also select settings for your printed pages, including page numbers, time and date, and collation of multiple copies.

Make sure your printer meets the control command requirements for printing from the projector.

1. Press the Print button on the control pad or remote control, or select the Print tool on the bottom toolbar.
2. Select the number of copies and whether you want to print in color or black only (monochrome).
3. Select one of the following under Range:
   - **All** to print all the pages in the current whiteboard session
   - **Current** to print only the current whiteboard page
   - **Selection** if you want to print selected pages. Tap the numbers in the boxes to select the range of pages.
4. To make additional settings, select Advanced.
You see a screen like the following:

5. Select any of the following settings:
   - **Printer** to choose between a **USB** and **Network** printer connection
   - **Paper Size** to choose the size paper loaded in the printer (Letter or A4)
   - **Pages per sheet** to print multiple reduced pages on one sheet of paper
   - **Page Border** to add a border around each page
   - **Page Number** to print the page number on each page
   - **Date & Time** to print the time and date stamp on each page
   - **Collate** to collate pages when printing multiple copies
   - **Duplex Printing** to print on both sides of the paper

6. When you are ready, select **Print**.
Emailing Your Whiteboard Pages

If your projector is set up on your network, you can email your pages directly from the projector.

Note: Mail server settings must be configured before you can email from the projector. Use the Whiteboard Settings function on the projector's Extended menu to configure email options.

1. Select the Email tool on the bottom toolbar.
   You see a screen like the following:

2. To enter the email address for the recipient, tap the E-mail Address text box.
   The on-screen keyboard appears.
3. Use the keyboard to enter the email address and select OK.
4. Select the plus icon to add another email address. You can send email to 10 addresses.
   Note: If you imported an address book, you can select the address book icon to add up to 10 addresses.
5. Use the on-screen keyboard to enter the subject that you want to appear on the **Subject** line.

6. Use the on-screen keyboard to enter a file name for the attachment.

7. Select the file format for emailing. If you choose PDF or EWF (Epson Whiteboard Format), you can encrypt the file and add a password.

8. Select any of the following under **Range**:
   - **All** to send all the pages in the current whiteboard session (available for PDF or EWF format only)
   - **Current** to send only the current whiteboard page
   - **Selection** if you want to send a range of pages (available for PDF or EWF format only). Tap the numbers in the boxes to select the range of pages.

9. When you are ready, select **Send**.
   Your page or pages are sent.

Starting a Shared Whiteboard Session

You can share the whiteboard with up to 15 devices on the same network SSID, including other projectors that support whiteboard sharing, computers, and other devices.

**Note:** In order to share the whiteboard, the projector must be set up on a network, and your network administrator must have opened TCP port 80. If using SSL, also open port 443.

1. Press the **Whiteboard** button on the remote control or control pad, or select the whiteboard icon on the toolbar.

   The projector displays the whiteboard.

2. Select the share icon on the bottom toolbar.

   A dialog is displayed.

3. Select **Start sharing with this whiteboard**.

   You see a dialog displaying the PIN code.
4. When connecting to the shared whiteboard, users must enter the PIN code. If you want to set your own PIN code, select the PIN code field and enter a new 7-digit code.

**Note:** After you share the whiteboard, you cannot change the PIN code unless you restart the whiteboard sharing session.

5. Select the **Start** button.

6. To set editing permissions for connected users, select the share icon on the bottom toolbar again. You see the Shared Whiteboard dialog.

7. Select one of the following as the **Share Configuration** setting to permit access to features by devices connecting to the whiteboard:
   - **Presentation**: Connected devices can view and save the whiteboard screen.
   - **Discussion**: Connected devices can draw on the shared screen.
   - **Collaboration**: Connected devices can access all available features except creating a new meeting.

**Note:** The projector displays connection information about the shared whiteboard under **Network information**.
8. Select **Stop sharing this whiteboard** to end the whiteboard sharing session.

9. Select **Close**.

**Connecting to a Shared Whiteboard from a Projector**

You can connect another projector on the same network to a projector that is sharing its whiteboard.

1. Press the **Whiteboard** button on the remote control or control pad, or select the ![whiteboard icon](image) on the toolbar.
   The projector displays the whiteboard.
2. Press the ![share icon](image) on the bottom toolbar.
   The projector displays the Shared Whiteboard dialog.

3. Select **Connect to the shared whiteboard**.
   The projector displays the Shared Whiteboard dialog.
4. Enter the IP address and PIN code for the projector you want to connect to.

   **Note:** To display the addresses for the last five projector connections, select the arrow icon next to the address field.

5. Press the **Connect** button.

   Both projectors display the shared whiteboard screen.

   To disconnect from the shared whiteboard, select the share icon on the bottom toolbar and select **Disconnect**.

**Drawing on a Projected Image (Annotation Mode)**

You can project from a computer, tablet, video device, or other source and add notes to your projected content using the interactive pens or your finger (BrightLink Pro 1430Wi). You can use one pen, both pens at the same time, or a combination of pens and finger touch (BrightLink Pro 1430Wi).

1. Project an image from a connected device.
2. Hover near or tap the board or projected image with the interactive pen or your finger (BrightLink Pro 1430Wi). Tap the **annotation icon on the toolbar.**
You see the main toolbar on the side and the projection control toolbar on the bottom of the projected image.

3. To move the main toolbar to the other side of the screen, tap the arrow on the opposite side of the screen.

   **Note:** You can use the pen or your finger (BrightLink Pro 1430Wi) to move the arrow icon up or down to reposition the toolbar.

4. To switch to one of the other interactive modes, do one of the following:
   - To switch to whiteboard mode, select the Whiteboard tool.
   - To switch to PC Interactive mode, select , then select .

   **Note:** You can also press the **Pen Mode** button on the remote control to switch between modes.

5. To close the main toolbar, select the icon at the bottom of the toolbar.

   **Note:** If you want to hide the toolbar automatically after drawing, select the icon at the bottom of the toolbar.
6. To show or hide the projection control toolbar, select the arrow.

---

**Splitting the Screen**

You can split the screen and project from two sources at the same time. You can annotate and interact with both sources.

1. Press the **Split** button on the remote control or select the ![Split](image) Split tool on the bottom toolbar.
   
   The current image is reduced and appears on the left side of the projection surface.

2. Press the ![Source Select](image) Source Select icon on the bottom toolbar.
You see a screen like this:

3. Select the two sources you want to display. Not all combinations of sources are valid. If you want to write on a blank screen, select any unused source. Unused sources display the color selected in the Display Background setting. The Logo option will display a blue background.

   **Note:** You can also press the Menu button on the remote control and select the Source option to select the two sources.

4. Press the Switch Source button to display the two sources.

5. Do any of the following as necessary:
   - To change to a different source at any time, press the Menu button on the remote control and select Source, or press the Select Source icon on the bottom toolbar.
   - To annotate on the right screen, press the Menu button on the remote control, select Target Pen Mode, and select Screen Right. Set the Pen Mode setting to PC Free Annotation.
• To use PC interactive mode on the right screen, press the Menu button on the remote control, select Target Pen Mode, and select Screen Right. Set the Pen Mode setting to PC Interactive.

Note: If you select Video, USB1, or USB2 as a source, you cannot use PC interactive mode.

• To reverse the left and right images, press the Menu button on the remote control and select Swap Screens.

• To make one image larger, press the Menu button on the remote control, select Screen Size, and select Larger Left or Larger Right.

6. To return to displaying one image, press the Esc button on the remote control, or press the Split Screen icon on the bottom toolbar.

Note: The following operations cannot be performed during split screen projection:
• Menu settings
• E-Zoom
• Switching aspect mode
• Operations made by the User button on the remote control
• Auto Iris
• Light Optimizer
• Image Processing
• Freeze (if one screen is displaying the whiteboard)

Maintaining and Transporting the Projector

Follow the instructions in these sections to maintain your projector and transport it from place to place.

Projector Maintenance
Transporting the Projector

Projector Maintenance

Your projector needs little maintenance to keep working at its best.
You may need to clean the projection window and obstacle sensor periodically, and clean the air filter and air vents to prevent the projector from overheating due to blocked ventilation.
The only parts you should replace are the lamp, air filter, pen batteries and tips, control pad batteries, and remote control batteries. If any other part needs replacing, contact Epson or an authorized Epson servicer.

Warning: Before cleaning any part of the projector, turn it off and unplug the power cord. Never open any cover on the projector, except as specifically explained in this manual. Dangerous electrical voltages in the projector can injure you severely.

Warning: Do not try to service this product yourself, except as specifically explained in this manual. Refer all other servicing to qualified servicers.

Replacing the Interactive Pen Tips

Parent topic: Maintaining and Transporting the Projector

Cleaning the Projection Window

Clean the projection window periodically, or whenever you notice dust or smudges on the surface.

• To remove dust or smudges, gently wipe the projection window with lens-cleaning paper.
To remove stubborn smudges, moisten a soft, lint-free cloth with lens cleaner and gently wipe the projection window.

**Warning:** Do not use a lens cleaner that contains flammable gas. The high heat generated by the projector lamp may cause a fire.

**Caution:** Do not use canned air, or the gases may leave a flammable residue.

**Parent topic:** Projector Maintenance

**Related tasks**

- Turning Off the Projector

**Cleaning the Obstacle Sensor**

Clean the projector’s obstacle sensor glass (circled in red) periodically, or if you see a message telling you to remove any obstacles that are interfering with the projection area.

To remove dust or smudges, gently wipe the obstacle sensor glass with lens-cleaning paper.

To remove stubborn smudges, moisten a soft, lint-free cloth with lens cleaner and gently wipe the obstacle sensor glass.

**Warning:** Do not use a lens cleaner that contains flammable gas. The high heat generated by the projector lamp may cause a fire.
Caution: Do not use canned air, or the gases may leave a flammable residue.

Parent topic: Projector Maintenance
Related tasks
Turning Off the Projector

Cleaning the Projector Case
Before cleaning the projector case, turn off the projector and unplug the power cord.

- To remove dust or dirt, use a soft, dry, lint-free cloth.
- To remove stubborn dirt, use a soft cloth moistened with water and mild soap. Do not spray liquid directly on the projector.

Caution: Do not use wax, alcohol, benzene, paint thinner, or other chemicals to clean the projector case. These can damage the case. Do not use canned air, or the gases may leave a flammable residue.

Parent topic: Projector Maintenance
Related tasks
Turning Off the Projector

Air Filter and Vent Maintenance
Regular filter maintenance is important to maintaining your projector. Your Epson projector is designed with an easily accessible, user-replaceable filter to protect your projector and make regular maintenance simple. Filter maintenance intervals will depend on the environment.

If regular maintenance is not performed, your Epson projector will notify you when the temperature inside the projector has reached a high level. Do not wait until this warning appears to maintain your projector filter as prolonged exposure to high temperatures may reduce the life of your projector or lamp.

Damage due to the failure to properly maintain the projector or its filter may not be covered by the projector or lamp Limited Warranties.

Cleaning the Air Filter and Vents
Replacing the Air Filter

Parent topic: Projector Maintenance

Cleaning the Air Filter and Vents
Clean the projector's air filter or vents if they get dusty, or if you see a message telling you to clean them.
1. Turn off the projector and unplug the power cord.
2. Slide the air filter cover latch and open the air filter cover.
3. Pull the air filter out of the projector.

4. Vacuum the front of the air filter (the side with the tabs) to remove any remaining dust.

**Note:** If dust is difficult to remove or the air filter is damaged, replace the air filter.
5. Place the air filter back in the projector as shown.

6. Close the air filter cover.

**Parent topic:** Air Filter and Vent Maintenance

**Related tasks**

Turning Off the Projector

**Replacing the Air Filter**

You need to replace the air filter in the following situations:

- After cleaning the air filter, you see a message telling you to clean or replace it
- The air filter is torn or damaged

You can replace the air filter while the projector is mounted on the wall or ceiling.

1. Turn off the projector and unplug the power cord.
2. Slide the air filter cover latch and open the air filter cover.
3. Pull the air filter out of the projector.

**Note:** Air filters contain polypropylene. Dispose of used air filters according to local regulations.
4. Place the new air filter in the projector as shown.

5. Close the air filter cover.

**Parent topic:** [Air Filter and Vent Maintenance](#)

**Related tasks**
- [Turning Off the Projector](#)
- [Projector Lamp Maintenance](#)

**Projector Lamp Maintenance**

The projector keeps track of the number of hours the lamp is used and displays this information in the projector's menu system. Replace the lamp as soon as possible when the following occurs:

- The projected image gets darker or starts to deteriorate
- A message appears when you turn on the projector telling you to replace the lamp
- The projector's lamp light is flashing orange and its power light is flashing blue

- [Replacing the Lamp](#)
- [Resetting the Lamp Timer](#)
Replacing the Lamp

Before you replace the lamp, let the projector cool down for at least one hour so the lamp will not be hot.

**Warning:** Let the lamp fully cool before replacing it to avoid injury.

You can replace the lamp while the projector is mounted on the wall or ceiling.

1. Turn off the projector and unplug the power cord.
2. Allow the projector lamp to cool down for at least one hour.

   **Warning:** If the lamp is broken, glass fragments may be loose inside the lamp chamber. Be careful removing any broken glass to avoid injury. If the projector is mounted on the wall or ceiling, stand to the side in case the lamp is broken.

3. Use the screwdriver included with the replacement lamp to loosen the screw securing the lamp cover.
4. Slide off the lamp cover.

5. Loosen the screws securing the lamp to the projector. The screws do not come all the way out.
6. Lift up the lamp handle and gently pull the lamp out of the projector.

![Lamp handle lifted and lamp pulled out](image)

**Note:** The lamp(s) in this product contain mercury. Please consult your state and local regulations regarding disposal or recycling. Do not put in the trash.

7. Gently insert the new lamp into the projector along the guide rail. If it does not fit easily, make sure it is facing the right way. Press the handle down.

**Caution:** Do not touch any glass on the lamp assembly to avoid premature lamp failure.
8. Tighten the screws to secure the lamp.

9. Replace the lamp cover and tighten the screw to secure it.

Note: Be sure the lamp cover is securely installed or the lamp will not come on.
Reset the lamp timer to zero to keep track of the new lamp’s usage.

Parent topic: Projector Lamp Maintenance

Related tasks
Turning Off the Projector
Resetting the Lamp Timer

Resetting the Lamp Timer

You must reset the lamp timer after replacing the projector’s lamp to clear the lamp replacement message and to keep track of lamp usage correctly.

Note: Do not reset the lamp timer if you have not replaced the lamp to avoid inaccurate lamp usage information.

1. Turn on the projector.
2. Press the Menu button.
3. Select the Reset menu and press Enter.
4. Select Reset Lamp Hours and press Enter.
   You see a prompt asking if you want to reset the lamp hours.
5. Select Yes and press Enter.
6. Press Menu or Esc to exit the menus.
Replacing the Remote Control Batteries

The remote control uses two AA manganese or alkaline batteries. Replace the batteries as soon as they run out.

**Caution:** Use only the type of batteries specified in this manual. Do not install batteries of different types, or mix new and old batteries.

1. Open the battery cover as shown.

2. Remove the old batteries.

**Warning:** If the battery fluid has leaked, wipe it away with a soft cloth and avoid getting the fluid on your hands. If it gets on your hands, wash them immediately to avoid injury.
3. Insert the batteries with the + and – ends facing as shown.

4. Close the battery cover and press it down until it clicks into place.

**Warning:** Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

**Parent topic:** Projector Maintenance

**Replacing the Interactive Pen Batteries**

Each pen uses one AA alkaline or Sanyo Eneloop rechargeable battery. Replace the battery as soon as it runs out.
When the battery is low, the pen light flashes as you turn on the switch. When the battery runs out, the pen light goes out.

**Caution:** Use only the type of batteries specified in this manual.

1. Open the battery cover as shown.

![Image of battery cover open](image)

2. Remove the old battery.

**Warning:** If the battery fluid has leaked, wipe it away with a soft cloth and avoid getting the fluid on your hands. If it gets on your hands, wash them immediately to avoid injury.

3. Insert the battery with the + and – ends facing as shown.

![Image of battery inserted](image)
4. Replace the battery cover and press it down until it clicks into place.

**Warning:** Dispose of used batteries according to local regulations. Do not expose batteries to heat or flame. Keep batteries out of the reach of children; they are choking hazards and are very dangerous if swallowed.

**Parent topic:** Projector Maintenance

**Replacing the Interactive Pen Tips**

If the pen tips become damaged or no longer work correctly, you can replace them.

1. Twist off the tip of the pen to remove it.
2. Twist on the new tip.

Parent topic: Projector Maintenance

Transporting the Projector

The projector contains precision parts, some of which are glass. Follow these guidelines to transport or ship the projector safely:

- Remove any equipment connected to the projector.
- When transporting the projector a long distance or as checked luggage, pack it in a firm box with cushioning around it and mark the box "Fragile."
- When shipping the projector for repairs, place it in its original packing materials, if possible, or use equivalent materials with cushioning around the projector. Mark the box "Fragile."

Note: Epson shall not be liable for any damages incurred during transportation.

Projection Problem Tips

If the projector is not working properly, try turning it off and unplugging it. Then plug it back in and turn it on.

If this does not solve the problem, check the following:

• The lights on the projector may indicate what the problem is.
• The solutions in this manual can help you solve many problems.

If none of these solutions help, you can contact Epson for technical support.

### Solutions When No Image Appears

If no image appears, try the following solutions:

- Press the **A/V Mute** button on the remote control to see if the image was temporarily turned off.
- Make sure all necessary cables are securely connected and the power is on for the projector and connected video sources.
- Press the projector’s power button to wake it from standby or sleep mode. Also see if your connected computer is in sleep mode or displaying a blank screen saver.
- Check the settings on the Signal menu to make sure they are correct for the current video source.
• Adjust the Brightness setting or select the Normal Power Consumption setting.
• Check the Display setting to make sure Messages is set to On.
• If the projector does not respond when you press the control panel buttons, the buttons may be locked. Unlock the buttons.
• If the projector does not respond when you press buttons on the remote control, make sure the remote receivers are turned on.
• For images projected with Windows Media Center, reduce the screen size from full screen mode.
• For images projected from applications using Windows DirectX, turn off DirectX functions.

Solutions When Image is Incorrect Using the USB Display Function

If no image appears or if the image appears incorrectly using the USB Display function, try the following solutions:
• Press the Source Search button on the remote control or control pad and select USB Display.
• Make sure the USB Display software has installed correctly. Install it manually if necessary.
• Make sure the USB Type B setting in the Extended menu is set to one of the USB Display options.
• With Mac OS X, select the USB Display icon in the Dock or from the Applications folder.
• Change the computer’s resolution to 1280 × 800.
• For images projected with Windows Media Center, reduce the screen size from full screen mode.
• For images projected from applications using Windows DirectX, turn off DirectX functions.
• If the mouse cursor flickers, select Make the movement of the mouse pointer smooth in the Epson USB Display Settings program on your computer (feature not available with Windows 2000).
• Turn off the Transfer layered window setting in the Epson USB Display Settings program on your computer.

Parent topic: Solving Image or Sound Problems
Solutions When "No Signal" Message Appears

If the "No Signal" message appears, try the following solutions:

- Press the **Source Search** button and wait a few seconds for an image to appear.
- Turn on the connected computer or video source, and press its play button to begin your presentation, if necessary.
- Check the connection from the projector to your video sources.
- If you are projecting from a laptop computer, make sure it is set up to display on an external monitor.
- If necessary, turn the projector and the connected computer or video source off and then on again.

**Displaying From a PC Laptop**

If you see the "No Signal" message when you display from a PC laptop, you need to set up the laptop to display on an external monitor.

1. Hold down the laptop's **Fn** key and press the key labelled with a monitor icon or **CRT/LCD**. (See your laptop manual for details.) Wait a few seconds for an image to appear.
2. To display on both the laptop's monitor and the projector, try pressing the same keys again.
3. If the same image is not displayed by the laptop and projector, check the Windows **Display** utility to make sure the external monitor port is enabled and extended desktop mode is disabled. (See your computer or Windows manual for instructions.)
4. If necessary, check your video card settings and set the multiple display option to Mirror or Duplicate.

Parent topic: Solutions When "No Signal" Message Appears

Displaying From a Mac Laptop

If you see the "No Signal" message when you display from a Mac laptop, you need to set up the laptop for mirrored display. (See your laptop manual for details.)

1. Open the System Preferences utility and select Displays.
2. Click the Arrangement tab.
3. Select the Mirror Displays checkbox.

Parent topic: Solutions When "No Signal" Message Appears

Solutions When "Not Supported" Message Appears

If the "Not Supported" message appears, try the following solutions:

• Make sure the correct input signal is selected on the Signal menu.
• Make sure the computer’s display resolution does not exceed the projector’s resolution and frequency limit. If necessary, select a different display resolution for your computer. (See your computer manual for details.)

Parent topic: Solving Image or Sound Problems

Solutions When Only a Partial Image Appears

If only a partial computer image appears, try the following solutions:

• Press the Auto button on the remote control to optimize the image signal.
• Try adjusting the image position using the Position menu setting.
• Press the Aspect button on the remote control to select a different image aspect ratio.
• If you zoomed into or out of the image using the E-Zoom buttons, press the Esc button until the projector returns to a full display.
• Check your computer display settings to disable dual display and set the resolution within the projector’s limits. (See your computer manual for details.)
• Check the resolution assigned to your presentation files to see if they are created for a different resolution than you are projecting in. (See your software help for details.)

Solutions When the Image is Not Rectangular
If the projected image is not evenly rectangular, try the following solutions:
• If the projector is not mounted on the wall or ceiling, place it directly in front of the center of the screen, facing it squarely, if possible.
• If you adjusted the projector height using the projector feet, press the keystone buttons on the projector to adjust the image shape. (BrightLink Pro 1420Wi)
• Adjust the Quick Corner or Keystone setting to correct the image shape.

Note: Adjusting Quick Corner and Keystone settings may affect focus and pen calibration.

Parent topic: Solving Image or Sound Problems

Related tasks

Correcting Image Shape with Quick Corner

Solutions When the Image Contains Noise or Static
If the projected image seems to contain electronic interference (noise) or static, try the following solutions:
• Check the cables connecting your computer or video source to the projector. They should be:
  • Separated from the power cord to prevent interference
  • Securely connected at both ends
  • Not connected to an extension cable
  • No longer than 10 feet (3 m) for VGA/computer cables or 24 feet (7.3 m) for HDMI cables
• Check the settings on the projector's Signal menu to make sure they match the video source.
• Select a computer video resolution and refresh rate that are compatible with the projector.
• Try a different cable.

Solutions When the Image is Fuzzy or Blurry

If the projected image is fuzzy or blurry, try the following solutions:
• Adjust the image focus.
• Check the projector lens cover glass for condensation.

  Note: To avoid condensation on the lens after bringing the projector in from a cold environment, let the projector warm up to room temperature before using it.

• Position the projector close enough to the screen, and directly in front of it.
• Position the projector so the keystone adjustment angle is not so wide that it distorts the image.
• Adjust the Sharpness setting to improve image quality.
• If you are projecting from a computer, press the Auto button on the remote control to automatically adjust the tracking and sync. If any bands or overall blurriness remain, display a uniformly patterned image on the screen and manually adjust the Tracking and Sync settings.
• If you are projecting from a computer, use a lower resolution.

Solutions When the Image Brightness or Colors are Incorrect

If the projected image is too dark or light, or the colors are incorrect, try the following solutions:

• Press the **Color Mode** button on the remote control to try different color modes for the image and environment.

• Check your video source settings.

• Adjust the available settings on the Image menu for the current input source, such as **Brightness**, **Contrast**, **Tint**, **Color Adjustment**, and/or **Color Saturation**.

• Make sure you selected the correct **Input Signal** or **Video Signal** setting on the Signal menu, if available for your image source.

• Make sure all the cables are securely connected to the projector and your video device. If you connected long cables, try connecting shorter cables.

• If you are using the **ECO** Power Consumption setting, try selecting **Normal** in the projector’s menus.

• Position the projector close enough to the screen.

• If the image has been progressively darkening, you may need to replace the projector lamp soon.

Solutions to Sound Problems

If there is no sound when you expect it or the volume is too low or high, try the following solutions:

• Adjust the projector’s volume settings.

• Press the **A/V Mute** button on the remote control to resume video and audio if they were temporarily stopped.

• Press the **Source Search** button to switch to the correct input source, if necessary.

• Check your computer or video source to make sure the volume is turned up and the audio output is set for the correct source.
• Check the audio cable connections between the projector and your video source.
• If you do not hear sound from an HDMI source, set the connected device to PCM output.
• Make sure any connected audio cables are labeled "No Resistance".
• If you are using the USB Display function, turn on the **Output audio from the projector** setting in the Epson USB Display Settings program on your computer.
• If you are using a Mac and you do not hear sound from an HDMI source, make sure your Mac supports audio through the HDMI port. If not, you need to connect an audio cable.
• If you want to use a connected audio source when the projector is off, set the **Standby Mode** option to **Communication On** and the **A/V Output** option to **Always On**.
• If you want to use a connected audio source when the projector is off, set the **Standby Mode** option to **A/V Standby**.
• If you turn the projector on immediately after turning it off, the cooling fans may run at high speed momentarily and cause an unexpected noise. This is normal.

**Solutions to Projector Power or Shut-Off Problems**

- If the projector does not come on when you press the power button or it shuts off unexpectedly, try the following solutions:
  - Make sure the power cord is securely connected to the projector and to a working electrical outlet.
• The projector’s buttons may be locked for security. Unlock the buttons or use the remote control to turn on the projector.
• The power cord may be defective. Disconnect the cord and contact Epson.
• If the projector’s lamp shuts off unexpectedly, it may have entered standby mode after a period of inactivity. Press the power button to wake the projector.
• If the projector’s lamp shuts off and the power and Temp lights are red, the projector has overheated and shut off. Check the solutions for this light status.
• If the power button on the remote control does not turn on the projector, check its batteries and make sure the Remote Receiver setting is turned on in the projector’s menu, if available.

Solutions to Problems with the Remote Control

If the projector does not respond to remote control commands, try the following solutions:
• Check that the remote control batteries are installed correctly and have power. If necessary, replace the batteries.
• Make sure you are operating the remote control within the reception angle and range of the projector.
• Make sure the projector is not warming up or shutting down.
• Check to see if a button on the remote control is stuck down, causing it to enter sleep mode. Release the button to wake the remote control up.
• Strong fluorescent lighting, direct sunlight, or infrared device signals may be interfering with the projector’s remote receivers. Dim the lights or move the projector away from the sun or interfering equipment.
• If available, turn off one of the remote receivers in the projector’s menu system, or check if all the remote receivers were turned off.
• If you assigned an ID number to the remote control to operate multiple projectors, you may need to check or change the ID setting (feature not available with all projectors).
• If you lose the remote control, you can order another one from Epson.

Solutions When the Interactive Pens Do Not Work

If the interactive pens do not work, try the following solutions:

- The pens turn off automatically if you forget to turn them off. Tap the pen tip or press the power/function button to turn the pen back on.
- Make sure you are not covering the black section near the tip of the pen.
- Make sure nothing is blocking the signal between the pen and the interactive pen receiver on the projector.
- Try holding the pen at a different angle so that your hand is not blocking the signal.
- Make sure the cable cover is in place to keep cables from blocking the signal.
- Make sure the pen battery has enough power. Try replacing the battery.
- If you are projecting from a computer, make sure the USB cable is connected to the computer and projector.
- Dim the room lights and turn off any fluorescent lights. Make sure the projection surface and pen receiver are not in direct sunlight or other sources of bright lighting.
- Remove any decorative lights from around the projector or projection surface.
- If the pen tip is worn out or damaged, you may need to replace it.
- Make sure the interactive pen receiver on the projector is clean and free from dust.
- Make sure there is no interference from infrared remote controls, mice, or infrared microphones.
- Make sure the USB Type B option on the Extended menu is set to Easy Interactive Function or USB Display/Easy Interactive Function.
• Make sure you have calibrated the system. Try recalibrating.
• If you are projecting from a laptop computer, make sure the battery has enough power, or connect the laptop to a power outlet.
• Make sure the **Pen Mode** and **Pen Operation Mode** settings are set correctly in the **Easy Interactive Function** options on the Extended menu.
• If you are using multiple projectors in the same room, change the **Distance of Projectors** setting in **Easy Interactive Function > Advanced** on the Extended menu.

**Solutions When the Interactive Pen Position Is Not Accurate**

If the pen position is not the same as the mouse pointer, try the following solutions:

• Make sure you have calibrated the system. Try manual calibration.
• Make sure the cable cover is in place to keep cables from blocking the signal.
• Try adjusting the pen operation area.
• If you use the **E-Zoom +** button on the remote control to enlarge the image, the pen position is not accurate. When you return the image to the original size, the position should be correct.
• In PC Interactive mode (in the Extended > Advanced menu), turn off **Auto Adjust Pen Area** and select **Manual Adj. Pen Area**.
• Try changing the computer's resolution to 1280 × 800.

**Parent topic:** Solving Interactive Problems

**Related concepts**
- **Pen Calibration**

Solutions When Manual Calibration Does Not Work

If you are having trouble calibrating manually, try the following solutions:

- If the circle does not move to the next position, or it moves automatically, dim or turn off any bright lights near the projection surface.
- Make sure the projector is not too close to the projection surface.

Parent topic: Solving Interactive Problems

Solutions When the Interactive Pens Are Slow or Difficult to Use

If the pens are difficult to use or respond too slowly, try the following solutions:

- For easier operation, hold the pen perpendicular to the projection surface.
- For the best performance, connect your computer to the projector using a VGA or HDMI cable for display and the USB cable for interactivity.
- If you are using a computer, try setting your computer’s display to 1280 × 800.
- If you are using USB Display in Windows, you may need to disable Windows Aero in the Epson USB Display Settings program on your computer.
- If you are projecting over a network, see the EasyMP Network Projection Operation Guide for performance adjustment instructions.

Parent topic: Solving Interactive Problems

Related tasks
Using the Pens

Solutions When the Interactive Pens Cause Interference or Unwanted Effects

If the pens are causing interference or unwanted effects, try the following solutions:

- When both pens are used at the same time, make sure they are approximately 4 inches (10.16 cm) apart.
- Turn off the pens when they are not in use.
- Do not rest the pens on the image area of an interactive table, to avoid interference with your computer’s mouse.
- Try changing the Number of Pen Users setting from One User to Two Users. (BrightLink Pro 1420Wi)
- Turn off hovering.
Solutions When Finger Touch Interactivity Does Not Work

If finger touch interactivity does not work (BrightLink Pro 1430Wi), try the following solutions:

- Make sure the Touch Unit is installed correctly and the power cable is properly connected. See your mount's Installation Guide for details.
- If the light on the Touch Unit is not on, check the Touch Unit Setup settings in the Easy Interactive Function option on the Extended menu and make sure the Power setting is set to On.
- Adjust the angle on the Touch Unit.
- Make sure there are no obstacles (such as cables or pen trays) between the Touch Unit’s laser diffusion ports and the projection surface.
- Remove any decorative lights from around the projector or projection surface.
- Make sure there is no interference from infrared remote controls, mice, or infrared microphones.
- Make sure you have performed pen calibration and finger touch calibration. Try recalibrating.

Solutions for Problems With Capturing, Printing, Saving, or Scanning

If you are having trouble capturing and pasting, or printing, saving, or scanning, try the following solutions:

- If you start a process using one of the pens, you must complete it using the pen. If you start using the remote control or control pad, you must complete the process using the remote control or control pad.
- If you are having trouble pasting a captured image, make sure the image is not protected.
- If a black frame appears around a pasted image, it may be because the image was shifted or resized.
- If you are having trouble printing or scanning, make sure the printer is not out of ink, jammed, or in any other error state.
• For USB printing or scanning, make sure a USB cable is connected between the projector’s USB-A port and the USB-B port on the control pad. Make sure another USB cable is connected between the Printer port on the control pad and the printer itself.
• For USB printing or scanning, try connecting a different USB cable, and make sure the cables are less than 16 ft (4.9 m) long.
• Connect only one printer or multifunction device at a time, and make sure the device is supported by the projector.
• Check the Whiteboard Settings on the Extended menu.

Solutions When You Cannot Access the Projector Through the Web

If you are unable to access the projector through a web browser, make sure you are using the correct ID and password, which are case sensitive.

- For the user ID, enter **EPSONWEB**. (You cannot change the user ID.)
- For the password, enter the password set in the projector's Network menu. The default password is **admin**.
- Make sure you have access to the network the projector is on.

**Note:** The user ID and password are case sensitive.

Solutions When Network Alert E-Mails are Not Received

If you do not receive an e-mail alerting you to problems with a projector over the network, try the following solutions:

- Make sure the projector is turned on and connected to the network correctly. (If an error shut down the projector, it cannot send an e-mail.)
- Make sure you set up the projector e-mail alert settings correctly on the projector's network Mail menu or in the network software.

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.
Internet Support
Visit Epson’s support website at epson.com/support (U.S.) or epson.ca/support (Canada) for solutions to common problems with your projector. You can download utilities and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative
To use the Epson PrivateLine Support service, call (800) 637-7661. This service is available for the duration of your warranty period. You may also speak with a projector support specialist by dialing (562) 276-4394 (U.S.) or (905) 709-3839 (Canada).
Support hours are 6 AM to 8 PM, Pacific Time, Monday through Friday and 7 AM to 4 PM, Pacific Time, Saturday.
Days and hours of support are subject to change without notice. Toll or long distance charges may apply.
Before you call, have the following information ready:
• Product name
• Product serial number (located on the bottom or rear of the projector, or in the menu system)
• Proof of purchase (such as a store receipt) and date of purchase
• Computer or video configuration
• Description of the problem

Purchase Supplies and Accessories
You can purchase screens, other optional accessories, and replacement parts from an Epson authorized reseller. To find the nearest reseller, call 800-GO-EPSON (800-463-7766). Or you can purchase online at epsonstore.com (U.S. sales) or epson.ca (Canadian sales).
To purchase a replacement remote control, call (562) 276-4394 (U.S.) or (905) 709-3839 (for dealer referral in Canada).

General Projector Specifications

Type of display Poly-silicon TFT active matrix
Resolution 1280 × 800 pixels (WXGA)
Lens F=1.80
Focal length: 3.71 mm
Color reproduction Full color, up to 1 billion colors
Brightness Normal Power Consumption mode:
White light output 3300 lumens (ISO 21118 standard)
Color light output 3300 lumens
ECO Power Consumption mode:
White light output 1900 lumens (ISO 21118 standard)

Note: Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

Supported Video Display Formats

For best results, your computer's monitor port or video card resolution should be set to display in the projector's native resolution. However, your projector includes Epson's SizeWise chip that supports other computer display resolutions, so your image will be resized to fit automatically.

Your computer's monitor port or video card refresh rate (vertical frequency) must be compatible with the projector. (See your computer or video card manual for details.)

The table here lists the compatible refresh rate and resolution for each compatible video display format.

Recycling

Epson offers a recycling program for end of life products. Please go to epson.com/recycle for information on how to return your products for proper disposal.

Parent topic: Notices

Important Safety Information

Caution: Never look into the projector lens when the lamp is turned on; the bright light can damage your eyes. Never let children look into the lens when it is on. Never open any cover on the projector, except the lamp and filter covers. Dangerous electrical voltages inside the projector can severely injure you. Except as specifically explained in this User's Guide, do not attempt to service this product yourself. Refer all servicing to qualified service personnel.

Warning: The projector and its accessories come packaged in plastic bags. Keep plastic bags away from small children to avoid any risk of suffocation.

Caution: When you replace the lamp, never touch the new lamp with your bare hands; the invisible residue left by the oil on your hands may shorten the lamp life. Use a cloth or glove to handle the new lamp.

Parent topic: Notices
Important Safety Instructions

Follow these safety instructions when setting up and using the projector:

• Do not look into the lens when the projector is on. The bright light can damage your eyes. Avoid standing in front of the projector so the bright light does not shine into your eyes.
• Do not place the projector on an unstable cart, stand, or table.
• Do not operate the projector on its side, or while tilted to one side. Do not tilt the projector more than 3° forward or back.
• If the projector is mounted on a ceiling or wall, it should be installed by qualified technicians using mounting hardware designed for use with this projector.
• When installing or adjusting a ceiling or wall mount, do not use adhesives to prevent the screws from loosening and do not use oils or lubricants. This may cause the projector case to crack and the projector to fall from its ceiling mount. This could cause serious injury to anyone under the mount and could damage the projector.
• Do not use the projector near water, sources of heat, high-voltage electrical wires, or sources of magnetic fields.
• Use the type of power source indicated on the projector. Use of a different power source may result in fire or electric shock. If you are not sure of the power available, consult your dealer or power company.
• Place the projector near a wall outlet where the plug can be easily unplugged.
• Take the following precautions when handling the plug: Do not hold the plug with wet hands. Do not insert the plug into a dusty outlet. Insert the plug firmly into the outlet. Do not pull the power cord when disconnecting the plug; always be sure to hold the plug when disconnecting it. Do not overload wall outlets, extension cords, or power strips. Failure to comply with these precautions could result in fire or electric shock.
• Do not place the projector where the cord can be walked on. This may result in fraying or damage to the plug.
• Unplug the projector from the wall outlet before cleaning. Use a dry cloth (or, for stubborn dirt or stains, a moist cloth that has been wrung dry) for cleaning. Do not use liquid or aerosol cleaners, any sprays containing flammable gas, or solvents such as alcohol, paint thinner, or benzine.
• Do not block the slots and openings in the projector case. They provide ventilation and prevent the projector from overheating. Do not operate the projector on a sofa, rug, or other soft surface, or set it on top of loose papers. Do not cover the projector with a blanket, curtain, or tablecloth. If you are setting up the projector near a wall, leave at least 7.9 inches (20 cm) of space between the wall and the air exhaust vent.
• Do not operate the projector in a closed-in cabinet unless proper ventilation is provided.
• Never allow objects of any kind to enter any openings in the projector. Do not leave objects, especially flammable objects, near the projector. Never spill liquid of any kind into the projector.

• If you are using two or more projectors side-by-side, leave at least 2 feet (60 cm) of space between the projectors to allow for proper ventilation.

• You may need to clean the air filter and vent. A clogged air filter or vent can block ventilation needed to cool the projector. Do not use canned air, or the gases may leave a residue.

• Do not store the projector outdoors for an extended length of time.

• Except as specifically explained in this manual, do not attempt to service this product yourself. Refer all servicing to qualified personnel. Opening or removing covers may expose you to dangerous voltages and other hazards.

• Never open any covers on the projector except as specifically explained in this manual. Never attempt to disassemble or modify the projector. Refer all repairs to qualified service personnel.

• Unplug the projector from the wall outlet and refer servicing to qualified service personnel under the following conditions: if it does not operate normally when you follow the operating instructions, or exhibits a distinct change in performance; if smoke, strange odors, or strange noises come from the projector; if the power cord or plug is damaged or frayed; if liquid or foreign objects get inside the projector, or if it has been exposed to rain or water; if it has been dropped or the housing has been damaged.

• Do not touch the plug during an electrical storm. Otherwise, you may receive an electric shock.

• Unplug the projector when it will not be used for extended periods.

• Do not use the projector where it may be exposed to rain, water, or excessive humidity.

• Do not use or store the projector where it may be exposed to smoke, steam, corrosive gases, excessive dust, vibration, or shock.

• Do not use the projector where flammable or explosive gases may be present.

• Do not use or store the projector or remote control in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.

• If you use the projector in a country other than where you purchased it, use the correct power cord for that country.

• Do not stand on the projector or place heavy objects on it.

• Do not use the projector outside of the required temperature range of 41 to 95 °F (5 to 35 °C) at an altitude of 4921 feet (1500 m) or less, or 41 to 86 °F (5 to 30 °C) at a higher altitude. Doing so may cause an unstable display and could lead to projector damage. Do not use or store the projector where it may be exposed to sudden changes in temperature.
• Do not store the projector outside of the required temperature range of 14 to 140 °F (–10 to 60 °C) or in direct sunlight for long periods of time. Doing so may cause damage to the case.
• Do not place anything that can become warped or damaged by heat near the exhaust vents. Do not bring your hands or face close to the vents while projection is in progress. Do not bring your face close to the projector while it is in use.
• Before you move the projector, make sure its power is turned off, the plug is disconnected from the outlet, and all cables are disconnected.
• Never try to remove the lamp immediately after use because it will be extremely hot. Before removing the lamp, turn off the power and wait at least an hour to allow the lamp to cool completely.
• Do not disassemble the lamp or subject it to impacts.
• Do not place the source of an open flame, such as a lit candle, on or near the projector.
• Do not block the lens during projection using a book or any other object. This could damage the projector or cause a fire.
• Do not modify the power cord. Do not place heavy objects on top of the power cord or bend, twist, or pull it excessively. Keep the power cord away from hot electrical appliances.
• If the lamp breaks, ventilate the room to prevent gases contained in the lamp from being inhaled or coming in contact with your eyes or mouth. If you do inhale gases or gases come in contact with your eyes or mouth, seek medical advice immediately.
• If the projector is mounted overhead and the lamp breaks, be careful to prevent pieces of glass from falling into your eyes or mouth when you open the lamp cover. If pieces of glass do get into your eyes or mouth, seek medical advise immediately.
• Always lower the volume before turning off the projector. Turning on the projector with the volume too high can damage your ears.
• Do not store the interactive pens or the batteries in a hot location, such as near a heater, in direct sunlight, or in a closed vehicle.
• Remove the batteries from the interactive pens if you will not be using the pens for a long time.

Note: The lamp(s) in this product contain mercury. Please consult your state and local regulations regarding disposal or recycling. Do not put in the trash.

WARNING: The cords included with this product contain chemicals, including lead, known to the State of California to cause birth defects or other reproductive harm. Wash hands after handling. (This notice is provided in accordance with Proposition 65 in Cal. Health & Safety Code § 25249.5 and following.)

Restriction of Use
Restriction of Use

When this product is used for applications requiring high reliability/safety such as transportation devices related to aviation, rail, marine, automotive; disaster prevention devices; various safety devices; or functional/precision devices, you should use this product only after giving consideration to including fail-safes and redundancies into your design to maintain safety and total system reliability.

Because this product was not intended for use in applications requiring extremely high reliability/safety such as aerospace equipment, main communication equipment, nuclear power control equipment, or medical equipment related to direct medical care, please make your own judgment on this product's suitability after a full evaluation.

FCC Compliance Statement

For United States Users

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user’s authority to operate the equipment.
For Canadian Users

The GNU General Public License Version 2 is as follows. You also can see the GNU General Public License Version 2 at http://www.gnu.org/licenses/.

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to

314
using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.
1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:
a) Accompany it with the complete corresponding machine-readable source code, which must be
distributed under the terms of Sections 1 and 2 above on a medium customarily used for software
interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no
more than your cost of physically performing source distribution, a complete machine-readable copy of
the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a
medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source
code. (This alternative is allowed only for noncommercial distribution and only if you received the
program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an
executable work, complete source code means all the source code for all modules it contains, plus any
associated interface definition files, plus the scripts used to control compilation and installation of the
executable. However, as a special exception, the source code distributed need not include anything that
is normally distributed (in either source or binary form) with the major components (compiler, kernel, and
so on) of the operating system on which the executable runs, unless that component itself accompanies
the executable.

If distribution of executable or object code is made by offering access to copy from a designated place,
then offering equivalent access to copy the source code from the same place counts as distribution of
the source code, even though third parties are not compelled to copy the source along with the object
code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under
this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will
automatically terminate your rights under this License. However, parties who have received copies, or
rights, from you under this License will not have their licenses terminated so long as such parties remain
in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else
grants you permission to modify or distribute the Program or its derivative works. These actions are
prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program
(or any work based on the Program), you indicate your acceptance of this License to do so, and all its
terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient
automatically receives a license from the original licensor to copy, distribute or modify the Program
subject to these terms and conditions. You may not impose any further restrictions on the recipients'
exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to
this License.
7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.
NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR
THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR
IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY
AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND
PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE,
YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL
ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE
OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR
DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES
OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH
HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best
way to achieve this is to make it free software which everyone can redistribute and change under these
terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each
source file to most effectively convey the exclusion of warranty; and each file should have at least the
"copyright" line and a pointer to where the full notice is found.

one line to give the program's name and a brief idea of what it does.

Copyright (C) year, name of author

This program is free software; you can redistribute it and/or modify it under the terms of the GNU
General Public License as published by the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without
even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See
the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not,
write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301
USA.
Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type 'show w'. This is free software, and you are welcome to redistribute it under certain conditions; type 'show c' for details.

The hypothetical commands 'show w' and 'show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than 'show w' and 'show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

GNU LGPL

This projector product includes the open source software programs which apply the GNU Lesser General Public License Version 2 or later version ("LGPL Programs").

We provide the source code of the LGPL Programs until five (5) years after the discontinuation of same model of this projector product.

If you desire to receive the source code of the LGPL Programs, please contact Epson as described in the User's Guide.

These LGPL Programs are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

The list of LGPL Programs is as follows and the names of author are described in the source code of the LGPL Programs.

LGPL Programs

glibc-2.8
SDL-1.2.13
The GNU Lesser General Public License Version 2 is as follows. You also can see the GNU Lesser General Public License Version 2 at http://www.gnu.org/licenses/.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc. 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the
recipients, so that they can relink them with the library after making changes to the library and
recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this
license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library.
Also, if the library is modified by someone else and passed on, the recipients should know that what they
have is not the original version, so that the original author's reputation will not be affected by problems
that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make
sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive
license from a patent holder. Therefore, we insist that any patent license obtained for a version of the
library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License.
This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite
different from the ordinary General Public License. We use this license for certain libraries in order to
permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of
the two is legally speaking a combined work, a derivative of the original library. The ordinary General
Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The
Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's
freedom than the ordinary General Public License. It also provides other free software developers Less
of an advantage over competing non-free programs. These disadvantages are the reason we use the
ordinary General Public License for many libraries. However, the Lesser license provides advantages in
certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a
certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be
allowed to use the library. A more frequent case is that a free library does the same job as widely used
non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we
use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of
people to use a large body of free software. For example, permission to use the GNU C Library in non-
free programs enables many more people to use the whole GNU operating system, as well as its variant,
the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that
the user of a program that is linked with the Library has the freedom and the wherewithal to run that
program using a modified version of the Library.
The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you". A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables. The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification").

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.
c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.
If distribution of object code is made by offering access to copy from a designated place, then offering
equivalent access to copy the source code from the same place satisfies the requirement to distribute
the source code, even though third parties are not compelled to copy the source along with the object
code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the
Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in
isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative
of the Library (because it contains portions of the Library), rather than a "work that uses the library". The
executable is therefore covered by this License. Section 6 states terms for distribution of such
executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object
code for the work may be a derivative work of the Library even though the source code is not. Whether
this is true is especially significant if the work can be linked without the Library, or if the work is itself a
library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small
macros and small inline functions (ten lines or less in length), then the use of the object file is
unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object
code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under
the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not
they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library"
with the Library to produce a work containing portions of the Library, and distribute that work under terms
of your choice, provided that the terms permit modification of the work for the customer's own use and
reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the
Library and its use are covered by this License. You must supply a copy of this License. If the work
during execution displays copyright notices, you must include the copyright notice for the Library among
them, as well as a reference directing the user to the copy of this License. Also, you must do one of
these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library
including whatever changes were used in the work (which must be distributed under Sections 1 and 2
above); and, if the work is an executable linked with the Library, with the complete machine-readable
"work that uses the Library", as object code and/or source code, so that the user can modify the Library
and then relink to produce a modified executable containing the modified Library. (It is understood that
the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.
Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

one line to give the library’s name and a brief idea of what it does.
Copyright (C) year, name of author

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the library 'Frob' (a library for tweaking knobs) written by James Random Hacker.

signature of Ty Coon, 1 April 1990

Ty Coon, President of Vice

That's all there is to it!

libjpeg
This projector product includes the open source software program "libjpeg" which applies the terms and conditions provided by owner of the copyright to the "libjpeg".

The "libjpeg" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

List of libjpeg programs
libjpeg-6b
License terms of conditions of each program which are provided by owner of the copyright to the "libjpeg" are as follows.

Copyright (C) 1994-1997, Thomas G. Lane. This file is part of the Independent JPEG Group's software. For conditions of distribution and use, see the accompanying README file.

This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

LEGAL ISSUES

================

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:
The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is copyright (c) 1991-1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprizes of Menlo Park, CA. ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is copyright by M.I.T. but is also freely distributable.
It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, ATT, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. (Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it.) So far as we are aware, there are no patent restrictions on the remaining code.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format(c) is the Copyright property of CompuServe Incorporated. GIF(sm) is a Service Mark property of CompuServe Incorporated."

**libpng**

This projector product includes the open source software program "libpng" which applies the terms and conditions provided by owner of the copyright to the "libpng".

The "libpng" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This copy of the libpng notices is provided for your convenience. In case of any discrepancy between this copy and the notices in the file png.h that is included in the libpng distribution, the latter shall prevail.

COPYRIGHT NOTICE, DISCLAIMER, and LICENSE:

If you modify libpng you may insert additional notices immediately following this sentence.

This code is released under the libpng license.

libpng version 1.2.6, August 15, 2004, through 1.2.49, March 29, 2012, are Copyright (c) 2004, 2006-2009 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.2.5 with the following individual added to the list of Contributing Authors

Cosmin Truta
libpng versions 1.0.7, July 1, 2000, through 1.2.5 - October 3, 2002, are Copyright (c) 2000-2002 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-1.0.6 with the following individuals added to the list of Contributing Authors

Simon-Pierre Cadieux
Eric S. Raymond
Gilles Vollant

and with the following additions to the disclaimer:
There is no warranty against interference with your enjoyment of the library or against infringement. There is no warranty that our efforts or the library will fulfill any of your particular purposes or needs. This library is provided with all faults, and the entire risk of satisfactory quality, performance, accuracy, and effort is with the user.

libpng versions 0.97, January 1998, through 1.0.6, March 20, 2000, are Copyright (c) 1998, 1999 Glenn Randers-Pehrson, and are distributed according to the same disclaimer and license as libpng-0.96, with the following individuals added to the list of Contributing Authors:

Tom Lane
Glenn Randers-Pehrson
Willem van Schaik

libpng versions 0.89, June 1996, through 0.96, May 1997, are Copyright (c) 1996, 1997 Andreas Dilger Distributed according to the same disclaimer and license as libpng-0.88, with the following individuals added to the list of Contributing Authors:

John Bowler
Kevin Bracey
Sam Bushell
Magnus Holmgren
Greg Roelofs
Tom Tanner

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger
Dave Martindale
The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.
2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A "png_get_copyright" function is available, for convenient use in "about" boxes and the like:

```c
printf("%s",png_get_copyright(NULL));
```

Also, the PNG logo (in PNG format, of course) is supplied in the files "pngbar.png" and "pngbar.jpg" (88x31) and "pngnow.png" (98x31).

Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.

License terms "Apache License Version 2.0, January 2004" are as follows.
Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/
TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION
1. Definitions.
"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by
Sections 1 through 9 of this document.
"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the
License.
"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled
by, or are under common control with that entity. For the purposes of this definition, "control" means (i)
the power, direct or indirect, to cause the direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial
ownership of such entity.
"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.
"Source" form shall mean the preferred form for making modifications, including but not limited to
software source code, documentation source, and configuration files.
"Object" form shall mean any form resulting from mechanical transformation or translation of a Source
form, including but not limited to compiled object code, generated documentation, and conversions to
other media types.
"Work" shall mean the work of authorship, whether in Source or Object form, made available under the
License, as indicated by a copyright notice that is included in or attached to the work (an example is
provided in the Appendix below).
"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived
from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works
shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
(b) You must cause any modified files to carry prominent notices stating that You changed the files; and
(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file,
excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other
Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!)
The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TOPPERS/JSP

This projector product includes the open source software program "TOPPERS/JSP" which applies the terms and conditions provided by owner of the copyright to the "TOPPERS/JSP".

The "TOPPERS/JSP" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

List of TOPPERS/JSP programs

jsp-1.4.3

License terms of conditions of each program which are provided by owner of the copyright to the "TOPPERS/JSP " are as follows.

TOPPERS/JSP Kernel

Toyohashi Open Platform for Embedded Real-Time Systems/Just Standard Profile Kernel

Copyright (C) 2000-2003 by Embedded and Real-Time Systems Laboratory Toyohashi Univ. of Technology, JAPAN

Copyright (C) 2004 by Embedded and Real-Time Systems Laboratory Graduate School of Information Science, Nagoya Univ., JAPAN.
The above copyright holder, limited to cases in which one satisfies conditions (1) ~ (4) below, or the conditions described in Version 2 of the GNU Public License officially announced by the Free Software Foundation, consents to the use, reproduction, alteration, and redistribution (hereafter called utilization) of this software (this software includes alterations, likewise below) without compensation.

(1) When this software is utilized in the form of source code, the above copyright declaration, these conditions of utilization, and the following stipulation of no guarantee shall be included in unchanged form inside the source code.

(2) When this software is redistributed in a form in which it can be used in the development of other software, library form, etc., the above copyright display, these terms of utilization, and the following stipulation of no guarantee shall be inserted in documentation accompanying redistribution (user's manual, etc.).

(3) When this software is redistributed in a form in which it cannot be used in the development of other software, embedded in devices, etc., one of the following conditions shall be satisfied.

(a) The above copyright display, these terms of utilization, and the following stipulation of no guarantee shall be inserted in documentation accompanying redistribution (user's manual, etc.).

(b) The TOPPERS Project shall be notified owing to a method in which the form of distribution is decided otherwise.

(4) The above copyright holder and the TOPPERS Project shall be exempt from responsibility for whatever damages occur either directly or indirectly through the utilization of this software.

This software is something that is provided with no guarantee. The above copyright holder and the TOPPERS Project make no guarantee whatsoever in regard to this software, including the possibility of its application. In addition, the above copyright holder and the TOPPERS Project shall also not bear responsibility for whatever damages occur either directly or indirectly through the utilization of this software.

Note: The TOPPERS License has been revised several times; what is shown above is the latest version that is to be applied to software made public hereafter.

TINET

This projector product includes the open source software program "TINET" which applies the terms and conditions provided by owner of the copyright to the "TINET".

The "TINET" are WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).
SSLeay license

This projector product includes the open source software program "OpenSSL" which applies the terms and conditions provided by owner of the copyright to the "OpenSSL".

List of OpenSSL programs

OpenSSL 1.0.1e

Copyright (c) 1995-1998 Eric Young (eay@cryptsoft.com) All rights reserved. This package is an SSL implementation written by Eric Young (eay@cryptsoft.com). The implementation was written so as to conform with Netscapes SSL. This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, Ihash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package. Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)". The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related.

If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgment: "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR
 OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE. The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence, including the GNU Public Licence.
