display slides ..................................................................... 6
project a laptop screen ...................................................... 7
adjust the lights or shades ................................................ 8
To project the computer screen, first, touch the Welcome Page. Then press COMPUTER and SEND TO PROJECTOR.
To play a VHS tape, insert the tape in the DVD/VCR player and press COMBO VCR and SEND TO PROJECTOR.
To play a DVD, insert the DVD in the DVD/VCR player and press COMBO DVD and SEND TO PROJECTOR.
To project a document from the document camera, turn on the document camera and press DOCUMENT CAMERA and SEND TO PROJECTOR on the control panel.
To display slides, load the slides in the carousel 80-slide trays and press SLIDE TO VIDEO and SEND TO PROJECTOR.
To project a laptop screen, connect the laptop to the lectern cable and press LAPTOP and SEND TO PROJECTOR.
To adjust the lights or shades, first click TO SYSTEM CONTROLS…
…and press the buttons for the lights or the drapes. To adjust the volume for the microphone, slide your finger over SPEECH; for the computer, laptop, or DVD/VCR, slide your finger over PROGRAM.
